The B5512 Control Panel integrates intrusion and residential fire, providing one simple user interface for both systems. The B5512 provides up to 48 individually identified points that can be split into 4 areas.

The control panel can communicate through its built-in Ethernet port (not applicable to “E” control panels), or through compatible plug-in modules that can send events over the public switched telephone network (PSTN) or over cellular network communications. With the B5512, you can monitor doors, windows, and motion within areas like showrooms or those that hold inventory. Each user can have a personalized passcode, a wireless keyfob, and an access credential to control the system.

Use programmable authority levels with restricted privileges to provide service, security, and cleaning personnel with full or limited access. Use the three programmable outputs (expandable up to 43) to turn on lights or lock and unlock doors. Users can:

- Turn on the system to secure the stockroom while you conduct daily business.
- Perform tests to ensure your system is working properly.
- Set your system to alarm immediately if a door opens.
- Activate the Watch feature so a tone sounds whenever a customer enters.
- Set a schedule for your system to automatically turn on at closing time.
- Use wireless security options to customize your system.

Provides up to 48 points using a combination of hardwired or wireless points for installation flexibility and up to 4 areas with perimeter and interior control

On-board Ethernet port for Connettix IP alarm communication and remote programming, compatible with modern IP networks including IPv6/IPv4, Auto-IP, and Universal Plug and Play

Installer-friendly features for simple installation and communications, including plug-in PSTN and cellular communication modules

Remote Security Control app which allows users to control their security systems - and view system cameras - remotely from mobile devices such as phones and tablets

Programmable keypad shortcuts, situation sensitive on-screen help, and a bilingual user interface make system operation simple and easy
Central monitoring stations provide 24-hour system monitoring with access to vital services. Professional security personnel can test the system, monitor system activity, and alert the police, fire department, or other emergency response teams if necessary.

**Functions**

**Programmable outputs**
- Three programmable on-board outputs; one high current using a relay, and two trigger outputs
- Output A, with a contact rating of 3 Amps, can supply up to 1.0 A total current from AUX PWR
- Outputs B and C sink up to 50 mA at 12 VDC
- Four alarm-output patterns
- Programmable bell test

**Point response**
- 20 custom point profiles
- Selectable point response time
- Cross point capability
- Fire alarm verification
- Dangerous gas indicator includes carbon monoxide (NFPA 720)
- Watch mode

**User interface**
- Supervision of up to 8 keypads
- Custom keypad text is fully programmable through RPS or the Installer Services Portal programming tool (available in Europe, Middle East, Africa, and China)
- Full function menu including custom functions
- Authority by area and 32 character name for each user
- 14 custom authority levels to restrict system features that each user can access
- Programmable primary and secondary language by user and keypad
- 12 available languages (any two can be concurrently used)

**User interface languages**
The following table shows the available languages per keypad type.

<table>
<thead>
<tr>

</table>

**Area configurations**
Link multiple areas to a shared area such as a lobby or common entryway. The shared area then automatically turns On (arms) when all associate areas are armed and turns Off (disarms) when any one associate area is disarmed. For higher security applications, the Area Re-Arm feature guarantees that areas are always rearmed, and are disarmed for no longer than a specific, configurable, amount of time (for example, service time).

**Custom functions**
For added convenience, the installer can program custom functions that allow customers to complete complex tasks with one simple action. For example, a custom function can bypass a group of points and arm the system, allowing the user to perform these functions with one easy command. Users can activate custom functions with a keypad, keyfob, token, or card, or the control panel can activate a function in reaction to a faulted point, or automatically through a scheduled event (SKED).

**Passcode security**
- Two-man rule. Requires two people with two unique passcodes to be present at the time of opening.
- Early ambush. Allows users to verify that the facility is safe by requiring two passcodes. The control panel sends a duress event if the user does not enter the passcode a second time after inspecting the premises.
- Dual authentication. Requires two forms of identification before processing certain system commands, including turning off the system and opening doors. A standard system user must have a passcode, a credential (token or card), and appropriate command authority permissions.

**Easy exit control**
The control panel changes from one On (armed) state to another without turning off (disarming) the system. For example, if you change the state from Part On (Perimeter Arm) to All On (Master Arm), the control panel complies and reports the change. Easy exit control reduces the number of keystrokes, simplifying system operation.

**Programmable passcode-controlled menu list**
Passcode-controlled shortcuts provide users only with the options and information pertinent to them, simplifying system operation.
Flexible control
The system provides the flexibility to choose added convenience or high security. For example, you can restrict to a keypad’s immediate local area turning on (arming) and turning off (disarming) the system with a passcode, even if the user has access to other areas. This is particularly useful for high security areas, where a user may have access to the area, but would prefer to only turn off (disarm) the area individually rather than with the rest of the system.

Monitor Delay/Delayed Response
Create a special point profile that delays the reaction of a point for a specified time (up to 1 hour in minutes and seconds). This delay provides time for the specified condition to reset before activating any annunciation. The system can annunciate locally and send a report, if desired. When the system is armed, the point can respond like a normal point - providing dual functionality. Use this feature to ensure that perimeter doors have not been propped open, or to monitor critical areas such as computer rooms and safes, for example.

System users
The system supports up to 50 users. Each user can have a personalized passcode, a wireless keyfob, and an access credential to control the system. You can assign passcodes to one of 14 customized authority levels in each area that can be restricted to operate only during certain times. Programmable primary and secondary language by user and keypad; select from English, Chinese, French, Greek, Hungarian, Italian, Polish, Portuguese, and Spanish.

Route groups and destinations
The control panel can send reports to four different route groups using one primary and up to three backup destination devices for each route group.

Reporting capabilities
The control panel has flexible communications for most central station receivers with reporting capabilities such as:
- Individual point numbers
- Opening or closing reports by user and area number
- Remote programming attempts
- Diagnostic reports

Destination test
It is possible to send test reports to each and all destinations within each route group.

Communication formats
The control panel sends reports in these formats:
- Contact ID (PSTN)
- Modem4 (PSTN)
- Conettix Modem4
- Conettix ANSI-SIA Contact ID
- ANSI-SIA DC-09

Notice
UL and ULC LISTED applications
ANSI-SIA DC-09 format is not available for UL and ULC LISTED applications.

IP communication
The control panel can use IP to communicate with a Conettix D6600 or a Conettix D6100IPv6 communications receiver/gateway. Use one of the following for IP:
- The on-board Ethernet connection (not applicable to “E” control panels)
- Ethernet Communication Module: B426
- Plug-in cellular communicator: B440/B441/B442/B443/B444/B444-A/B444-V

Conettix IP communication provides a secure path that includes anti-replay/anti-substitution features, and enhanced security with up to AES 256-bit encryption (using Cipher Block Chaining (CBC)). The control panel supports Domain Name System (DNS) for both remote programming and central station communication. DNS provides ease of use, eliminating the need to use static IP addresses as your reporting destination, and accommodates a simple solution for central station disaster recovery. The control panel supports both IPv6 and IPv4 networks.

Communication paths
The control panel accommodates up to four separate phone and four separate network paths to the central station receiver. When resetting alarms or turning a system on and off, the user is identified by name and number.

Personal notification
The control panel can send text messages and emails for personal notification over Ethernet or using a cellular communicator. You can configure up to 16 destinations using a combination of cellular phone numbers and email addresses. The control panel sends notifications in the user's programmed primary language.

Bosch Remote Connect (Cloud)
Remote Connect simplifies connections from RPS, and the Remote Security Control app, using Bosch Cloud services. This service creates a secure connection to the control panel without specific router settings or the need for a static IP address or DNS.

Notice
The Bosch Remote Connect service is not available in Europe, the Middle East, or Africa.

Firmware updates
Remote firmware updates are available.

A wide variety of input options
Each point:
- Single 1 kΩ, single 2 kΩ, dual 1 kΩ (1 kΩ + 1 kΩ), and No EOL (end-of-line) (EOL) resistor options (for on-board and B208 inputs)
- Programmable for Fire, Intrusion, Gas, and Supervisory devices
- Supports hardwired and wireless devices
- Supports IP cameras by Bosch as point and output devices

**IP camera support**
The control panel can integrate directly with Bosch IP cameras, using them as fully supervised points and outputs.
Integration of cameras allows the camera's video motion detection to activate points on the control panel. The control panel’s virtual outputs can be configured to trigger camera actions, including sending video snapshots via email.

**Video verification**
Ensure priority response by law enforcement and elimination of fines for false alarms through a subscription to Bosch CBS video verification services. The services also optionally enable your monitoring center to speak real-time to an intruder to deter further damage to your site.

**Notice**
The CBS video verification service is not available in Europe, the Middle East, or Africa.

**Security and fire detection**
The control panel provides eight on-board points, and up to 40 additional off-board points (depending on model and expansion interfaces). You can program individual points to monitor some types of burglar alarms, fire alarms, and supervision devices.

**Event log**
The event log stores local and reported events. The event log includes information such as time, date, event, area, point, and user. View the event log from a keypad or use RPS or the Installer Services Portal programming tool (available in Europe, Middle East, Africa, and China) to remotely retrieve event information. When the event log reaches a programmed threshold of stored events, it can send an optional report to a receiver.
The event log stores up to 255 local and reported events.

**Scheduled events (SKEDs)**
The internal clock and calendar start individually scheduled events (SKEDs). SKEDs perform several functions such as turn on or off, relay control, or point bypassing.
The control panel offers:
- Five scheduled events with up to 25 different functions
- Four opening windows and four closing windows
- Four user group windows
- Day-of-week, date-of-month, or holiday only schedules
- One holiday schedule of 366 days (leap year)

**Programming**
Installers can perform limited programming on-site with a keypad (critical parameters; such as account IDs, central station and RPS IP addresses and phone numbers, reporting formats, and more). They can also do full programming on-site or remotely (attended or unattended) with RPS. A programmable system passcode prevents unauthorized remote programming. Full programming is also possible with the web-based Installer Services Portal programming tool. The Installer Services Portal programming tool is available for panel firmware version 3.06 or higher.

**Notice**
The Installer Services Portal programming tool is available in Europe, Middle East, Africa, and China.

The following table shows the available languages for RPS and Installer Services Portal programming tool.

* RPS custom text is text, that can be entered in RPS and which will then be displayed on keypads and on the Remote Security Control app.

**Diagnostics**
Keypads, RPS and the Installer Services Portal programming tool (available in Europe, Middle East, Africa, and China) offer diagnostic help for monitoring and troubleshooting. The diagnostics features allow you to view the status of the wired and wireless devices. The features provide the status of the control panel and its connected devices, such as firmware version, power, and missing conditions. View the status of each area.
Remote Security Control app
The Remote Security Control app allows users to control their security systems remotely from their devices. Users can:
- Turn their security system On or Off
- Turn specific areas On or Off
- Control outputs for applications such as lighting control
- View live video from Bosch IP cameras
- Grant access remotely by unlocking and locking doors
The app requires the installing dealer to create a Remote Access Profile for users, and to install the profile on their devices.

Bosch Video Management System integration
With Bosch Video Management System (Bosch VMS) and an intrusion system, the VMS operator has a single user interface to monitor and control the intrusion system combined with video surveillance. With Bosch VMS and a control panel, the operator can, for example:
- View videos triggered by intrusion events, including all relevant information such as areas, point, and user show in the display with the event.
- View areas, points, outputs, and doors - with their statuses - on the Bosch VMS map, providing the exact location in the system.
- Turn on (arm) and turn off (disarm) areas.
- Bypass and unbypass points.
Requirements to integrate Bosch VMS with a control panel:
- A licensed Bosch VMS system using Professional Editions v5.5 or higher or Bosch VMS Enterprise.
- Edition v5.5 or higher.
- Expansion license to integrate the intrusion control panel. One license needed per control panel. Order number MBX-XINT-xx for the expansion license added to a Bosch VMS base license. Refer to the Bosch Video Management Software product page on the Bosch website, www.boschsecurity.com.
- Access to Remote Programming Software (RPS) and the Installer Services Portal programming tool (available in Europe, Middle East, Africa, and China).

Installation/configuration notes
Not all products and features are available in all regions. Consult your local Bosch representative for availability details.

Keypads
B940W Touch screen KP. White (SDI2)
B942/B942W Touch Screen Keypad (SDI2)
B930 ATM Style Alphanumeric Keypad (SDI2)
B921C Two-line Capacitive Keypad (SDI2)
B920 Two-line Alphanumeric Keypad (SDI2)
B915/B915I Basic Keypad (SDI2)

Power
CX4010 Plug-in Transformer (18 VAC 22 VA 60 Hz)
ICP-TR1822-CAN Plug-in Transformer (110 VAC primary, 18 VAC 22 VA secondary)
DE-45-18 Transformer
D126 Standby Battery (12 V, 7 Ah)
D1218 Battery (12 V, 18 Ah)
D122 Dual Battery Harness
D122 Dual Battery Harness with long leads

**Enclosures**

- B10 Medium Control Panel Enclosure
- B11 Small Control Panel Enclosure
- B12 Mounting Plate for D8103 Enclosure
- B8103 Universal Enclosure (requires a B12)
- D8108A Attack Resistant Enclosure (requires a B12)
- D8109 Fire Enclosure (requires a B12)
- D8108A-CE Attack Resistant Enclosure with Built-in Transformer (requires a B12)
- B-ENCL-1 Metal Enclosure Kit (includes B12 and transformer)

**Accessories**

- B56 Keypad Surface Mount Box
- B96 Keypad Trim Bezel
- B99 USB Direct Connect Cable
- B501-10 Interconnect wiring cables (pack of 10)

**Detectors**

- FCC-380 Carbon Monoxide Detector
- F220-P: Photoelectric Smoke Detector
- F-220-PTH: Photoelectric/Heat Detector
- FCP-OT320 Multisensor Detector Optical/Thermal
- FCP-0320 Optical Smoke Detector
- FCH-T320 Heat Detector

Bosch conventional detectors, including Professional Series, Blue Line Gen2, Blue Line, Classic Line, Commercial Line, and Ceiling Mount motion detectors, as well as glass break, seismic, request-to-exit, photoelectric, heat, and smoke detectors.

**Modules**

- B201 2-wire Powered Loop Module
- B208 Octo-input Module
- B308 Octo-output Module
- B426 Conettix Ethernet Communication Module
- B430 Plug-in Telephone Communicator

- B442 Conettix Plug-in Cellular Communicator (using GPRS)
- B443 Conettix Plug-in Cellular Communicator (using HSPA+)
- B444 Conettix Plug-in Cellular Communicator
- B444-A Plug-in cell module, AT&T LTE
- B444-Y Plug-in cell module, Verizon LTE
- B450 Conettix Plug-in Communicator Interface
- B520 Auxiliary Power Supply Module
- B810 wireless receiver (RADION)
- B820 SDI2 Inovonics Interface Module
- D113 Battery Lead Supervision Module
- D125B Dual Class B Initiating Module
- D129 Class A Initiating Module
- D130 Auxiliary Relay Module
- D132A Smoke Detector Reversing Relay Module
- D133/D134 Relay Module
- D135A Low Battery Disconnect Module
- D185 Reverse Polarity Signaling Module
- D192G Class “B”, Style Y Bell Circuit Supervision

**Applications**

- Remote Programming Software (RPS or RPS-LITE) v6.03 and higher
- Installer Services Portal programming tool
- Bosch Video Management System v5.5 and higher
- Remote Security Control

**Conettix receivers**

(Managed and configured with Conettix D6200 Programming/Administration Software v2.00)

- Conettix D6600 Communications Receiver/Gateway (with only D6641 line cards installed) with CPU version 01.10.00
- Conettix D6100IPv6 Communications Receiver/Gateway with CPU version 61.10.00
- Conettix D6100i Communications Receiver/Gateway with CPU version 61.10.00

**RADION wireless from Bosch**

- B810 wireless receiver (RADION)
- RFBT-A/RFBT bill trap
- RFDL-11-A/RFDL-11 TriTech motion detector
- RFDW-RM-A/RFDW-RM recessed door/window contact
- RFDW-SM-A/RFDW-SM surface door/window contact
- RFGB-A/RFGB glass break detector
RFKF-A/RFKF two-button keyfob
RFKF-FBS-A/RFKF-FBS four-button keyfob
RFKF-TBS-A/RFKF-TBS two-button keyfob
RFPB-SB-A/RFPB-SB single-button panic
RFPB-TB-A/RFPB-TB two-button panic
RFRP-A/RFRP repeater
RFSM-A/RFSM smoke detector
RFPR-12-A/RFPR-12 PIR motion detector
RFPR-C12-A/RFPR-C12 PIR curtain motion detector
RFUN-A/RFUN universal transmitter

Inovonics Wireless
B820 SDI2 Inovonics Interface Module
ENKIT-SDI2 SDI2 Inovonics Interface and Receiver Kit. Includes B820 and EN4200
EN1210 Universal Transmitter (Single-input)
EN1210EOL Universal Transmitter with EOL Resistor
EN1210W Door-Window Transmitter with Reed Switch
EN1215EOL Universal Transmitter with Wall Tamper, Reed Switch, and EOL Resistor
EN1223D Water-resistant Pendant Transmitter (Double-button)
EN1223S Water-resistant Pendant Transmitter (Single-button)
EN1224-ON Multiple-Condition Pendant Transmitter
EN1233D Necklace Pendant Transmitter (Double-button)
EN1233S Necklace Pendant Transmitter (Single-button)
EN1235D Beltclip Pendant Transmitter (Double-button)
EN1235S Beltclip Pendant Transmitter (Single-button)
EN1235DF Fixed-location Transmitter (Double-button)
EN1235SF Fixed-location Transmitter (Single-button)
EN1247 Glass-break Detector Transmitter
EN1249 Bill Trap Transmitter
EN1242 Smoke Detector Transmitter
EN1260 Wall Mount Motion Detector
EN1261HT High Traffic Motion Detector
EN1262 Motion Detector with Pet Immunity
EN1265 360° Ceiling Mount Motion Detector
EN4200 Serial Receiver
EN5040-T High Power Repeater with Transformer

Technical specifications

Communications

| Ethernet      | 10/100 full duplex (N/A for “E” control panels) |

Environmental considerations

| Relative humidity | 5% to 93% at +90°F (+32°C), non-condensing |
| Temperature (operating) | +32°F to +122°F (0°C to +49°C) |

Power requirements

| Current draw (maximum) | Idle 125 mA; alarm 155 mA |
| Output (alarm) | 1.3 A at 12 VDC |
| Output (auxiliary, continuous power, and switched auxiliary combined) | 800 mA at 12 VDC nominal |
| Voltage (operating): | 12 VDC nominal |
| Voltage (AC) | 16.5 - 18 VAC |

Number of...

| Areas | 4 |
| Custom functions | 4 |
| Events | 1024 |
| Passcode users | 50, plus 1 installer passcode |
| Points | 48 (8 on-board, up to 40 off-board and virtual) |
| Programmable outputs | 43 (3 on-board, up to 40 off-board and virtual) |
| RF points | 40 |
| IP cameras | 4 |
| SKEDs | 5 |

Ordering information

**B5512 IP control panel, 48 points**
Supports up to 48 points, 3 on-board outputs, and 4 areas for intrusion, residential fire. On-board Ethernet. Order number **B5512**

**B5512E Control panel, 48 points, no IP**
The B5512E is available only in kits. Order number **B5512E**
Accessories

**B520 Auxiliary power supply module, 2A 12V**
Provides auxiliary power to 12 VDC devices or to SDI2 modules.
Order number B520

**B201 2-Wire Powered Loop**
The module provides a single powered initiating device circuit. The module supports compatible 12 V 2-wire smoke detectors. It also supports connecting burglary devices to the control panel.
Order number B201

**B208 SDI2 8-Input Expansion Module**
Provides 8 programmable inputs.
Order number B208

**B308 SDI2 8-Output Expansion Module**
Provides 8 programmable relays.
Order number B308

**B810 Wireless SDI2 bus interface**
Receives RF signals from RADION transmitters, repeaters, and glassbreaks. Operates at 433.42 MHz. For use with compatible SDI2 bus control panels.
Order number B810

**D122 Dual battery harness, 17” 18AWG**
Harness with circuit breaker. Connects two batteries (in parallel) to a compatible control panel.
Order number D122

**D122L Dual battery harness, 35", 12V**
Harness with circuit breaker and leads measuring 35 in. (89 cm). Connects two batteries (in parallel) to a compatible control panel in a separate enclosure.
Order number D122L

**D126 Battery, 12V 7Ah**
A rechargeable sealed lead-acid power supply used as a secondary power supply or in auxiliary or ancillary functions.
Order number D126

**D1218 Battery, 12V 18Ah**
The D1218 is a 12 V 18 Ah sealed-lead-acid battery with two bolt-fastened terminals. It is used for standby and auxiliary power. It connects to a compatible control panel using a D122 or D122L Dual battery harness.
Order number D1218

**CX4010 Transformer, plug-in, 18V 22VA**
For use in North America. 110 VAC primary voltage input. 18 VAC, 22 VA secondary input.
Order number CX4010

**ICP-TR1822-CAN Transformer, plug-in, 18V 22VA, Canada**
For use in Canada. 110 VAC primary voltage input. 18 VAC, 22 VA secondary input.
Order number ICP-TR1822-CAN

**B8103 Universal enclosure, white**
White steel enclosure measuring 41 cm x 41 cm x 9 cm (16 in. x 16 in. x 3.5 in.).
Order number B8103

**D8108A Attack resistant enclosure, large, grey**
Grey steel enclosure measuring 41.5 cm x 41.5 cm x 9 cm (16 in. x 16 in. x 3.5 in.). UL Listed. Includes a lock and key set.
Order number D8108A

**D8109 Fire enclosure, 16x16x3.5", red**
Red enclosure, 16in. x 16in. x 3.5in. (41cm x 41cm x 9cm), 16 gauge (1.5mm) cold-rolled steel, full-length hinge, D101F lock and 2 D102F keys, UL Listed for commercial fire/burglary applications.
Order number D8109

**B10 Steel enclosure, medium, white**
White, steel enclosure. Accepts an optional lock and tamper switch. Measures 35.6 cm x 31.8 cm x 7.6 cm (14 in x 12.5 in x 3 in).
Order number B10

**B11 Steel enclosure, small, white**
White, steel enclosure. Accepts an optional lock and tamper switch. Measures 27.8 cm x 25.9 cm x 8.32 cm (10.9 in x 10.2 in x 3.3 in).
Order number B11

**B12 Mounting plate for D8103 enclosure**
Required for mounting select control panels and other devices in B8103, B8103, D8108A, D8109, and BATB Battery Box enclosures.
Order number B12

**B-ENCL-1 Metal Enclosure kit w/transformer**
White steel enclosure with installed 220 VAC transformer.
Order number B-ENCL-1

**D8004 Transformer enclosure kit, grey**
For applications that might require a remote transformer in an enclosure. Can be used with B Series control panels and D9412GV4/D7412GV4 control panels.
Order number D8004

**D101 Enclosure lock and key set**
Short-body lock set with one key supplied. Uses the D102 (#1358) replacement key.
Order number D101

**D110 Tamper switch for enclosure, 2pcs**
Screw-on tamper switch that fits all enclosures. Shipped in packages of two.
Order number D110

**ICP-EZTS Dual tamper switch**
Combination tamper switch with a wire loop for additional tamper outputs.
Order number ICP-EZTS
**B99 USB direct connect cable**
Male A to Male A USB cable for local programming of control panels with on-board USB ports.
Order number **B99**

**B915 Basic Keypad**
Two-line alphanumeric basic keypad with language function keys.
Available languages: English, Chinese, Dutch, French, German, Greek, Italian, Hungarian, Polish, Portuguese, Spanish, Swedish.
Order number **B915**

**B915i LCD keypad, icon keys, SDI2**
Two-line alphanumeric basic keypad with icon function keys.
Available languages: English, Chinese, Dutch, French, German, Greek, Italian, Hungarian, Polish, Portuguese, Spanish, Swedish.
Order number **B915i**

**B920 2 Line Alpha Numeric Keypad (SDI2)**
Two-line alphanumeric keypad
Available languages: English, Dutch, French, German, Hungarian, Italian, Portuguese, Spanish, Swedish.
Order number **B920**

**B921C Two-line Keypad w/Touch keys, Inputs**
