The DCNM-LPPP-P1Y is a participant based yearly prepaid license that enables a premium feature pack. The premium feature pack enables a voting and interpreting functionality together with multiple identification options. The meeting manager can prepare and manage the meetings easily and effectively using the powerful DICENTIS Software Suite.

By adding additional licenses, the maximum number of participants that can join a meeting increases. With the premium feature pack, a system using this license setup also allows for 1 participant to join from remote. License extensions must be done yearly by ordering additional prepaid licenses. Regular software updates are included throughout the life of the license.

### Functions

#### Participants

Based on the device in use, the participants:
- Can register their attendance via identification
- Have their preferred headphone language automatically selected upon login
- Have their user interface language automatically selected upon login
- Can issue requests to speak, if they have request to speak rights
- Can participate in voting rounds, if they have voting rights
- Can bypass the queue, if they have VIP rights
- Can issue a priority call, e.g. the chairperson, if they have priority rights;

- This license includes one participant that can join remotely. A system based on this license allows for one participant to join from remote. Hybrid add-on licenses can be added to extend the number of participants joining from remote. The number of participant licenses determines how many participants can join the meeting. The number of Hybrid add-on licenses plus the one included in the set of participant licenses defines the number of participants who can join from remote.

### Meeting manager preparing the meeting

For meeting preparation, the meeting manager is able to:
- Create profiles with preferred UI and headphone language
- Prepare meetings with:
  - Agenda
  - Identification mode
  - Quorum settings
- Assign participants to meetings with:
  - Discussing, VIP, and priority rights
  - Weighted voting and regular voting rights
  - Preferred seats
- Prepare request lists for agenda items
- Set the discussion mode per agenda item. The following discussion modes are supported:
  - Open automatic
  - Open manual
  - Response
Communications Systems - DCNM-LPPP-P1Y Participant premium pro prepaid

First in first out
Voice activated
Up to 25 microphones can be open at the same time
Up to 200 participants can be in the queue
Up to 200 participants can be in the response queue
The microphone can be automatically turned off after 30 seconds of silence
Configuration of speech timer per speaking turn to evenly distribute speaking time and increase the effectiveness of the meeting
Configurable queue display — You can decide whether the queue should be visible to participants

• Configure the default voting settings:
  - Answer set
  - Majority settings
  - Display settings
  - Individual/group results
  - Total results

Meeting manager managing the meeting
For the management of meetings, the meeting manager is able to:
• Control the meeting and agenda using the Meeting application
• Manage voting rounds using the Meeting application and define the reference number, subject and description of the voting round
• Manage discussions using the Meeting application or the configurable synoptic layout of the DICENTIS Webserver synoptic control

Meeting manager processing the meeting results
For processing the results, the meeting manager is able to:
• Access the meeting report with attendance and voting round results; The meeting report and voting results include information to detect tampering
• Access the voting results stored as separated files

Interpreter
The interpreter is able to:
• Interpret the floor language into 1 of the 100 languages supported by the DICENTIS system
• Interpret from another interpreter language into 1 of the 100 languages supported by the DICENTIS system
• Select the correct headphones or headset for optimum audio and hearing protection
• Configure the preferred input languages

Technician
The technician is able to:
• Configure the audio settings:
  - 2 analog inputs and outputs
  - 2 Dante inputs and outputs
  - 2 OMNEO inputs and outputs
  - Sound reinforcement equalizer
  - Delegate device loudspeaker equalizer
• Configure the audio on delegate loudspeaker
• Configure seats:
  - For request to speak rights
  - For priority
  - For VIP
  - For voting
  - For identification
  - For language selection
  - To be used by 2 participants
• Configure the interpreter seats using the Interpreter desks:
  - To assign seats to booths
  - To assign languages to desks
• Configure the synoptic layout for microphone control
• Configure the hall display layout to display the meeting, agenda, voting and discussion information
• Configure the sharing of a presentation on the hall display, multimedia device and interpreter desk with video output
• Configure the camera and video switching to display the active speakers on the hall display

Hall display
The Hall display can be used to:
• Control the ONVIF, Panasonic and Sony cameras to capture the image of the active speaker or speakers
• Control the TvOne CorioMatrix and Kramer MV6 SDI video switchers to show one speaker
• Control the IP-video based video matrix with enhanced video processing like name overlay, split screen, picture in picture and Mosaic to display one or more speakers
• Display meeting and agenda information
• Display attendance information including Quorum
• Display voting information, majority and individual and total results

3rd party systems
3rd party systems can be used to:
• Prepare and control meetings using the .NET API
• Control meetings using the WebSocket based Conference Protocol
NOTE: The .NET API and Conference Protocol are supported by documentation and a demo application including source code to facilitate implementation and validation. There are drivers available for AMX and Extron.

License extension
- The prepaid license has a duration of one year after activation.
- Email notifications inform the dealer that prepaid licenses are expiring so the dealer can activate new prepaid licenses to extend the duration.

Parts included

<table>
<thead>
<tr>
<th>Quantity</th>
<th>Component</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>E-mail with license activation information.</td>
</tr>
</tbody>
</table>

Technical specifications

- End date of license: 1 year after activation
- Software maintenance updates: Included
- Hybrid meetings\(^1\): 1 participant included

1 - Hybrid meetings are available in select countries and only active after accepting the Data Protection Agreement. Contact your local sales organization for more information.

System requirements
This section lists the minimal requirements for each part of the system.

PC
The minimal PC requirements for the computer running the services in a DICENTIS system are:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating system</td>
<td>Windows Server 2022</td>
</tr>
<tr>
<td>CPU passmark</td>
<td>&gt;= 10000(^*)</td>
</tr>
<tr>
<td>RAM</td>
<td>16 GB</td>
</tr>
<tr>
<td>Free disk space</td>
<td>50 GB</td>
</tr>
<tr>
<td>Ethernet card</td>
<td>1 GB for DICENTIS network, 1 GB for internet connection</td>
</tr>
</tbody>
</table>

Note: The power of the processor is measured by a CPU passmark score, because this gives a more reliable benchmark score than just the processor family:
- many different processor brands and families are available
- a processor intended for a laptop is not as powerful as the processor intended for a desktop, although both can be for example, an i7
- newer versions of the same processor are faster than older versions

To check the passmark score of a processor

2. Enter the processor (for example, i7-12700) in the CPU Name text box.
3. Check the CPU Mark column for the CPU passmark score (for example, i7-12700 scores 31114).

Alternatively, you can clear the textbox CPU Name and sort the CPU Mark column and see which processor scores above, for example, 7000.

Ordering information

DCNM-LPPP-P1Y Participant premium pro prepaid
Participant based yearly prepaid license with identification, voting and interpreting functionality for non-hybrid and hybrid conference meetings.
Order number DCNM-LPPP-P1Y | F.01U.411.287

Software Options
DCNM-LDANTE License for 1 Dante stream
This software license enables the sending or receiving of Dante multicast audio streams.
Order number DCNM-LDANTE | F.01U.354.449
