DCN-SWAPI-E API license

www.boschsecurity.com

Control DCN meeting, session, discussion and voting
Exchange and synchronize delegate and participants information with 3rd party systems
Import of vote scripts
Encoding ID cards solution for 3rd party systems
C-Sharp source code example available

DCN-SWAPI-E is deployed as Microsoft.Net components to be used by 3rd party applications to control, modify, add, remove and update a subset of the DCN-SW-E configuration data to prepare meetings. It also includes a subset of the DCN-SW-E control functionality to control meetings.

System overview

A 3rd party application will be connected to the DCN-SW-E Conference Software server as a client in the same way as the DCN-SW-E Configuration Application and Operation Application do. All changes applied through the DCN-SWAPI-E affect the meeting-configuration and currently active meeting immediately. All changes applied to the configuration or control data of a currently active meeting, will be actualized immediately to the operational state of the system.

Functions

The DCN-SWAPI-E enables the following control and configuration functions of DCN-SW-E via the API:

Control functions available via the API:
- Control the DCN system:
  - Stop and start meetings
- Stop and start sessions
- Control participants microphones
- Control request and response lists
- Control prepared and adhoc votings and summon participants for the voting

Configuration functions available via the API:
- Add or remove delegates to the system. This implies per delegate:
  - Definition of title, first, middle and last name
  - ID-card assignment
  - Assignment to a group (e.g. political party)
  - Language assignment
- Update delegate information
- Encode ID-card for a delegate (in combination with DCN-SWID-E)
- Assign or remove delegates as participant to or from a prepared or active meeting. This implies per participants:
  - Assignment to the meeting
  - Assignment to a seat
- Add or remove votes to/from a voting script of a prepared or active meeting. This implies per voting:
  - Assignment to voting script
  - Definition of voting template to use
  - Definition of voting answer set to use
  - Definition of voting 100% setting
• Update voting information in a voting script of a prepared or active meeting
• Example C-Sharp source code and extensive software developer manual available on DCN-SW-E DVD

The DCN-SWAPI-E license enables third party interfacing to DCN-SW-E software. To be able to use extended DCN-SW-E functionality, like Microphone Management (DCN-SWMM-E), Delegate Database (DCN-SWDB-E) or Voting (Parliamentary DCN-SWPV-E or Multi voting DCN-SWMV-E) via the API requires the appropriate DCN-SW-E licenses.

Technical specifications

DCN NG: DCN-SW-E
DCN-SW-E is required before you can use this license

Ordering information

DCN-SWAPI-E API license
DCN Next Generation conference software API. Enables 3rd party applications for controlling, modifying, adding, removing and updating a subset of DCN SW-E configuration and control data. To be used with the DCN SW-E Main module software license. Order number DCN-SWAPI-E

Software Options

DCN-SW-E Main module software license
DCN Next Generation conference software main module, a platform for running all other Conference software modules, electronic authorization code. Order number DCN-SW-E

DCN-SWMM-E Microphone management license
DCN Next Generation conference software microphone management for controlling speaker’s lists, request and response lists, and speech time. To be used with DCN-SW-E. Order number DCN-SWMM-E

DCN-SWDB-E Delegate database license
DCN Next Generation conference software delegate database. To be used with DCN-SW-E. Order number DCN-SWDB-E

DCN-SWPV-E Parliamentary voting license
DCN Next Generation conference software parliamentary voting for configuring and controlling voting. To be used with DCN-SW-E. DCN-SWDB-E is required for individual voting results. Order number DCN-SWPV-E
