

# DCN-SWSMV-E Synoptic microphone & voting license

www.boschsecurity.com

**BOSCH**

Invented for life

- ▶ Synoptic room overview for monitoring and controlling the microphones
- ▶ Voting control with individual results
- ▶ On-screen help in many languages

The DCN-SWSMV-E Synoptic microphone & voting license provides a range of conference facilities when used in combination with a DCN Wireless or DCN Next Generation system. The available functions include automatic seat assignment, synoptic microphone monitoring and control, and voting management.

## Functions

### Ease of use

Although it offers many powerful features, the software is extremely easy to use thanks to its innovative design. The application moves away from traditional control panels and buttons and replaces them with a highly intuitive graphic user interface. All functions are controlled from a single window making the software suitable for touch screen operation. The software features on-screen help in most major languages.

### User interface

The user interface is based on a graphical representation of the conference venue. When a device is connected to the system it is automatically recognized and an icon is created for it on the on-screen room layout. The icons display information

about device status and can be used by the operator to select individual devices for remote control functions. If a device becomes disconnected from the system, a red cross is displayed on top of its icon to alert the operator.

### Operating modes

The Synoptic microphone & voting license can operate in the following modes, depending on the required task:

- Assignment mode allows you to assign names to microphone icons. The positions of the icons on the room layout can also be changed using the standard windows 'drag & drop'.
- Microphone control mode allows you to observe and control the state of each individual microphone. Microphones can be switched on and off, or placed in the 'request to speak' queue.
- Battery and signal view mode shows the remaining battery charge time and the signal strength for each wireless discussion unit.
- Voting result mode shows individual results in different colors according to votes cast.

**Notice**

The different symbols in the various modes are specially designed so that they are also easily identified by persons with the visual disability of color blindness.

**Parliamentary and real-time voting**

The application provides parliamentary voting functionality. The system operator can summon delegates to vote, as well as starting and stopping voting sessions. Final vote results can be automatically printed or exported to a file.

**Installation/configuration notes**

Used in combination with a DCN Wireless or DCN Next Generation system.

**Parts included**

Quantity	Component
1	E-mail with license activation information

**Technical specifications**

Supported operating system	Windows 8.1 Pro 32 or 64 bits (including .NET Framework 3.5 feature). or Windows 10 Pro 32 or 64 bits (including .NET Framework 3.5 feature). All with the latest service packs and updates.
PC requirements	Processor i5 4 cores 2.4 GHZ. <ul style="list-style-type: none"> <li>• 8 GB RAM.</li> <li>• 20 GB free disk space.</li> <li>• 1 GB Ethernet card.</li> </ul>
