

DCN-SWVAML-E Voice microphone logging license

www.boschsecurity.com

BOSCH
Invented for life

- ▶ Log microphone activity to third party applications during Voice mode
- ▶ Use automatic camera control in Voice mode
- ▶ Record speaker information in Voice mode
- ▶ See who speaks during Voice mode

DCN-SWVAML-E Voice microphone logging license, enables the logging of who speaks while the DCN system is in voice mode. This enables automatic camera control using DCN-SWSACC-E, or recording speaker-names while the system is in voice-activated mode.

System overview

The DCN-SWVAML-E is an addition to the DCN-SW-E software and enables logging of microphone activity during Voice mode. Voice microphone logging license is developed for wired single CCU systems, based on the DCN-CCU(B)2, and for single delegate units. It is intended for applications where only one speaker is active at a time, for instance courtrooms.

Functions

The following functions are configurable:

- Microphone logging:
 - The logging can be enabled to start the monitoring of microphone activity during voice-mode.

- The audio level, at which the microphone is regarded as being on, can be set via audio threshold.
- The time the microphone stays on, after the audio level drops below the threshold, can be set via release time.
- Chairman priority:
 - The priority can be enabled to mute other microphones based on the audio on the chairman unit.
 - The priority chime can be enabled to automatically sound the priority chime when the chairman speaks.
 - The audio level, at which the chairman microphone is regarded as being on, can be set via audio threshold.
 - The time the chairman microphone stays on, after the audio level drops below the threshold, can be set via release time.
