The DIVAR hybrid recorders can simultaneously record and view video from traditional analog cameras as well as the latest IP cameras. The recorder can be connected to the following camera configurations:

- A maximum 32 IP cameras recording at resolutions up to 12MP
- A maximum 16 analog cameras recording at resolutions up to 960H
- A combination of maximum 16 analog cameras and maximum 16 IP cameras

These advanced technologies, coupled with efficient network data transmission, deliver the high security and reliability required for modern surveillance systems. Simultaneous remote or local monitoring, recording, archive and playback functions are guided by simple menu selections and operator commands. The recorders can be installed with a maximum of 4 internal HDDs for video storage. Another option is two HDDs for storage, plus a DVD burner for video export.

**Functions**

**Latest video compression technology**
The DIVAR supports H.264 and H.265 video compression technology. This technology dramatically reduces bandwidth and storage requirements while still delivering superb image and audio quality.

Equipped with this newest video technology, DIVAR gives you the full benefits of the latest high-resolution cameras. The proof is in the pixels.

**Camera IP support**
The recorder supports native camera integration with Bosch IP cameras which provides easy installation, configuration and maintenance options. This allows plug-and-play connectivity as the installer can connect and configure the cameras to the recorder without having to open every camera individually on a web client. For further configuration 3rd party cameras are supported through the ONVIF Profile S protocol.

**Simultaneous record and view**
The DIVAR records multiple video and audio signals while simultaneously providing live multi-screen viewing and playback. Comprehensive search and playback functions provide quick recall and viewing of recorded video.

**Simple operation**
The DIVAR is very easy to install and use. Simply connect the cameras, apply power, and follow the simple Install Wizard steps for initial setup. The unit can then record automatically with no further intervention required.
DDNS
Bosch offers its customers free Dynamic Domain Name Services (DDNS) for access to network-connected devices via a "friendly" hostname without the need for costly static IP addresses. This makes it easier for uninterrupted access to important video from devices regardless of their location.

Alarms
All models have extensive alarm handling functions and telemetry control. Alarm functions include local inputs and relay outputs, plus motion detection in user-defined areas. If an alarm is detected, the DIVAR can:
• send an e-mail notification and/or FTP push
• sound a buzzer and/or display a warning
• activate local alarm output

Local control
The unit can be easily operated and programmed via the on-screen display menu system using:
• the supplied mouse
• the front panel control keys
• the supplied remote control
• push notification

Inputs and outputs
Video inputs, audio inputs/output, and alarm inputs/outputs are located on the rear panel. Two video connectors (VGA/HDMI) provide simultaneous output for monitor A for live display (with zoom) and playback (display can be frozen and zoomed). The displays allow full-screen, multi-screen, and sequenced viewing.

Network control
Use the PC software or built-in web application via a network for live viewing, playback, and configuration.

Watermark
The DIVAR includes an authenticity check for both local and remote archives, ensuring recording integrity. An Archive Player is provided for playback of secure video files and to check if video is authentic.

Smartphone App
A DIVAR Viewer App from Bosch for iOS and Android devices is available for:
• live and playback viewing
• recorder configuration
• PTZ control
This means you can watch live video from cameras connected to the DVR from anywhere in the world. You can also control focus, pan, tilt and zoom on PTZ-enabled cameras.
Furthermore, the smartphone App supports remote push notifications. In this way you are automatically notified if an alarm occurs on the device and can take immediate action, even if you are not actively monitoring the system at that moment.

Dome control
The DIVAR can control IP pan/tilt/zoom (PTZ) equipment using commands sent via IP connection. It also supports Focus, Iris and Aux commands for Bosch cameras. RS-485 / RS-232 ports are available for serial communication to analog PTZ devices.

Panoramic cameras
The DIVAR supports dewarping of Bosch panoramic cameras. The following modes are supported: pan/tilt/zoom (PTZ), panoramic, corridor and quad. Dewarping in the camera can also be selected if the connected IP panoramic camera supports this.

Intuikey keyboard
One Bosch Intuikey keyboard can be connected to this unit to control dome cameras.

RAID software
Units installed with 2 HDDs can support RAID 1 software for mirroring drives. Units installed with 4 HDDs can support RAID 5 software. Using RAID has a large impact on the system performance. To keep the playback smooth, Bosch recommends to limit the playback to 4 channels.

Supported protocols
The DIVAR supports Bosch protocol and Pelco P and D protocol.

**Installation/configuration notes**

**VIDEO IN**
- 16 BNC for connecting max. 16 analog cameras

**Camera**
- Max. 16 IP cameras connected with external switch (if no analog cameras are connected, an extra 16 IP cameras can be connected)

**Ethernet**
- RJ45 Ethernet connection (10/100/1000Base-T according to IEEE802.3)

**VGA MON.A**
- 1 D-SUB (Monitor output)

**HDMI MON.A**
- 1 HDMI (Monitor output)

**HDMI MON.B**
- 1 HDMI (output for spot monitor that supports live multiscreen)

**ALARM IN**
- 16 screw terminal inputs, cable diameter AWG26-16 (0.4–1.29 mm)

**ALARM OUT**
- 6 screw terminal outputs, cable diameter AWG26-16 (0.4–1.29 mm)

**AUDIO IN**
- 4 RCA (Audio inputs)

**AUDIO OUT**
- 1 RCA (Audio output)

**MIC IN**
- 1 RCA (Audio input)

**RS-485**
- Screw terminal output (Dome control)

**KEYBOARD**
- Screw terminal output (Keyboard)

**VIDEO OUT**
- D-sub (loop through to other devices)

**RS-232**
- DB9 male, 9-pin D-type (Dome control)

---

**Power Input with On/Off switch**
- 100~240 VAC, 50-60 Hz, 1.9 A, 75 W

**RTC Battery on main PCB**
- Lithium CR2032, 3 VDC

**Maximum power consumption (no HDD)**
- 20 W

---

**Technical specifications**

**Mechanical**
- Dimensions (WxDxH): 440 x 408 x 76 mm (17.3 x 16.1 x 3.0 in)
- Weight (excluding HDD(s) and DVD): 6.67 kg (14.7 lb) approx.

  - Bidirectional (audio input and output connected via device)

**Ordering information**

**DRH-5532-400N00 Recorder 16ch IP, 16ch AN, 1.5U, no HDD**

High-resolution recorder for IP and analog surveillance systems.

Recorder 16ch IP/16ch AN 1.5U w/o HDD

Order number **DRH-5532-400N00**

**EWE-DIPSBS-IW 12mths wrty ext DIVAR 5000 w/out HDD**

12 months warranty extension

Order number **EWE-DIPSBS-IW**

**DRH-5532-414N00 Recorder 16ch IP/16ch AN 1.5U 1x4TB**

High-resolution recorder for IP and analog surveillance systems.

Combination of up to 16 IP and 16 analog camera channels.

1 HDD (4 TB)

Order number **DRH-5532-414N00**

**DRH-5532-214D00 Recorder 16ch IP/16ch AN 1.5U 1x4TB DVD**

High-resolution recorder for IP and analog surveillance systems.

Combination of up to 16 IP and 16 analog camera channels.

1 HDD (4 TB); 1 DVD

Order number **DRH-5532-214D00**

**Accessories**

**DVR-XS200-A HDD expansion 2TB**

Storage expansion kit. 2 TB
