BOSCH
Invented for life

Technical services: links / logical connections

System Overview

Create free detector lists, 10 lists each
Create a list and assign the relevant detectors.

Create links, 10 each
Create links with timers and miscellaneous conditions.

Create/change line statuses, 10 each
Define line statuses with text and color assignment and status lists.

Create/change detector types, 10 each
Create detector types and assign control commands / statuses.

Create detector icon, 10 each
Generate detector icon for new detectors in EMF format. We recommend using Adobe Illustrator for this purpose.

Create time programs, 10 each
Define a time program with week days, public holidays and special days, and save one time grid for each day.

Configure/change the report print-out
Specify the volume of information to be issued on the log printer.

Configure/change the counters
Create counters, assign a color, assign line statuses and test them.

Configure/change logbook
Define the writing filter for logbook entries.

Create location structure and assign graphic cut-outs, 10 locations each
Create locations and sub-locations in the form of a tree structure and assign the relevant graphic files (or cut-outs in the case of sub-locations) within the file.

Create print template for alarm print-out, per template
Create an XML/XSL-based customer-specific stylesheet for logbook analyses which deviate from the standard volume.

Install report tool / list generator
Install a separate list generator, e.g. crystal reports, for the purposes of logbook analysis.

Draw up report for analysis
Draw up a specific logbook analysis on the basis of the list generator you have installed and test it.

Change report for analysis
Change report and test it.
