

BOSCH

Invented for life

AWAG S 7002Q Auto dialer and announcement device

For automatic transmission of alarm reports, technical alarms and status changes in the form of voice messages via the analogue telephone network to any telephone connection. The code sender acknowledges these messages.

- ▶ Digital speech recording for announcement and alarm texts
- ▶ Monitoring of the telephone line voltage
- ▶ Absolute operating priority on the telephone connection
- ▶ Sabotage/blockage clearance
- ▶ Event memory specifying time and date
- ▶ Real-time clock with automatic daylight savings time change and leap year adjustment
- ▶ Years-long data storage through lithium battery

Ordering Information

AWUG S 7002Q pulse/tone dialer with power unit	2799340198
AWUG S 7002Q pulse/tone dialer without power unit	2799340197

Functions

- It is possible to call an answering machine or send messages to a city call/pager (numeric receiver).
- The announcement and alarm messages are recorded via a plug-in microphone and stored digitally.
- The device can be programmed in such a way that the program sequence is stopped when the message is correctly acknowledged.
- The device is intended for operation with an analogue telephone connection.
- The device is configured during installation.
- Increased current consumption is temporarily possible while the user status is active.
- The acknowledgement transmitter (optional) is an acoustic tone-dialling hand transmitter with 16 keys and a built-in lithium battery, for acknowledging messages.
