

# Learn Mode Supervised Wireless Photoelectric Smoke Detector

www.boschsecurity.com

**BOSCH**  
Invented for life

- ▶ Self-diagnostics and automatic drift compensation reduce the chance of nuisance alarms
- ▶ Learn Mode feature reduces installation time
- ▶ Two 3 V lithium batteries provide long battery life
- ▶ Mounting base tamper sends trouble signal if detector is removed

The Learn Mode Supervised Wireless Photoelectric Smoke Detector is self-diagnostic and includes an integrated Learn Mode 319.5 MHz crystal transmitter. It has a self-contained sounder, a low-battery annunciator, a status LED, and integrated fixed-temperature and rate-of-rise heat sensors.

## Functions

### Self-diagnostics and automatic drift compensation

The smoke detector continually monitors operational status and provides a visual trouble indication (LED) if it drifts out of sensitivity range or fails internal diagnostics. The built-in drift compensation feature allows the detector to automatically adjust sensitivity as the optical chamber becomes dirty over time.

### Learn Mode technology

Each device has a unique, programmed identity. Control panels recognize and learn the identity of each device in the system, eliminating programming errors in the field.

### Low battery indication

If the power level drops below 2.7 V, a low battery trouble signal is sent to the control panel and the built-in sounder begins to beep once every  $45 \pm 2$  sec.

## Certifications and approvals

GE holds these listings and approvals:

Region	Certification
USA	UL UTGT: Single- and Multiple-station Smoke Alarms (ANSI/UL217)
	CSFM 7257-1657:0242

## Installation/configuration notes

### Compatibility Information

Receivers	RF3226 Quik Bridge Receiver Quik Bridge Learn Mode Loop Receiver (P/N: 60-660-01-95R) D208RF Receiver Expander D216RF Receiver Expander
-----------	--

**Parts included**

Quant.	Component
1	Smoke detector
1	Smoke cover
2	3 V lithium batteries
1	Hardware pack
1	Literature pack

**Technical specifications****Electrical**

Recommended Battery Types:	Duracell 123, Panasonic CR123A, SANYO CR123A
Voltage:	3 VDC
<b>Current</b>	
• Alarm:	70 mA typical
• Average Standby:	0.035 mA typical
• Test:	2 mA typical

**Environmental**

Relative Humidity:	0 to 95%; non-condensing
Temperature (operating):	+4°C to +38°C (+40°F to +100°F)
Sensitivity:	2.3±0.890%
Drift Compensation:	0.5%/ft maximum
Sounder:	85 dB at 10 ft; temporal pattern
<b>Sensors</b>	
• Fixed:	+57.2±2.8°C (+135±5°F)
• Rate-of-Rise:	8.3°C/min > +40.6°C (15°F/min > +105°F)

**Mechanical**

Color:	White
<b>Dimensions</b>	
• Detector:	142 mm x 61 mm (5.6 in. x 2.4 in.)
• Base:	137 mm x 12 mm (5.4 in. x 0.46 in.)
Radio Frequency:	319.5 MHz
Bandwidth:	24 kHz

**Transmission Characteristics**

Radio Frequency	319.5 MHz
Modulation Type:	AM

Signal Format:	Pulse-width modulation
RF Immunity:	20 V/min minimum; 1 MHz to 1000 MHz

**Trademarks**

Trademark names are used throughout this document. In most cases, these designations are claimed as trademarks or registered trademarks in one or more countries by their respective owners. Rather than placing a trademark symbol in every occurrence of a trademark name, Bosch Security Systems, Inc. uses the names only in an editorial fashion and to the benefit of the trademark owner with no intention of infringing the trademark.

Duracell is a trademark owned or used by The Gillette Company or its affiliates.

Panasonic is a registered trademark of Matsushita Electric Industrial Co., Ltd.

SANYO is a registered trademark of SANYO North America Corporation.
