

Learn Mode Single Technology Sound Sensor

www.boschsecurity.com

BOSCH
Invented for life

- ▶ Detects sound of breaking glass ranging in thickness from 1.58 mm to 6.35 mm (0.0625 in. x 0.25 in.)
- ▶ Where appropriate, saves the cost of multiple glass break sensors
- ▶ 360° coverage pattern

The Learn Mode Single Technology Sound Sensor detects breaking glass and has a 360° coverage range over 4.6 m (15 ft) away. It is appropriate and economical for rooms with several windows. Wireless technology allows installers to put the sensor in a location based on application needs rather than on wiring limitations.

Functions

Learn Mode Technology

Each device has a unique, programmed identity. Control panels recognize and learn the identity of each device in the system, eliminating programming errors in the field.

Installation/configuration notes

Notice

Glassbreak detectors are intended only as a component of a perimeter protection system. They should always be used in conjunction with motion sensors.
