DCN-SWSMD Conference Software Streaming Meeting Data

www.boschsecurity.com

XML streams for easy processing and logging
Interface to video client applications to display meeting data by using video screens or video projectors
Video client application available on DCN-SW DVD
Example C-Sharp source code available on DCN-SW DVD
Software developer manual available

Conference Software Streaming Meeting Data is an interface to provide meeting data such as current speakers, request lists, vote results and other information to video screens or video projectors.

System overview

Conference Software Streaming Meeting Data unlike other Conference Software modules does not require any user interaction of an operator; it consists of a software interface from the Conference Software Server to any number of client applications. The interface consists of streams containing meeting data in XML format. Every time an activity (e.g. microphone on/off, start/stop vote) takes place data is sent over the XML stream. The stream can be picked up by a video client application which is connected to a video screen or a video projector to display the meeting data. The content of each stream can be freely defined so that each PC software Client receives only the required meeting data. The streams are protected meaning that only authorized PC software clients can receive the streams.

Functions

A great diversity of activities can be streamed. The main items are:

- Start/Stop meeting, speakers list, request list, vote results both Individual and totals, participating delegates.
- Filters are available to define the content of a stream; e.g. if only voting activity is required in the stream all other information can be filtered out.
- Activities are queued before they are sent to the stream. The size of the queues are free definable.
- Client authorization is controlled by a list of allowed IP addresses. Clients with unknown IP addresses will not be able to receive the stream.
- Example C-Sharp source code and software developer manual available on DCN-SW DVD
Ordering information

DCN-SWSMD Conference Software Streaming Meeting Data
To be used as an interface to provide meeting data such as current speakers, request list, vote results and other information to video screens or video projectors. Can only be used in combination with DCN-SW Conference Software main module.
Order number DCN-SWSMD

DCN-SWSMD-E Conference Software Streaming Meeting Data E-code
To be used as an interface to provide meeting data such as current speakers, request list, vote results and other information to video screens or video projectors. Can only be used in combination with DCN-SW Conference Software main module. Electronic authorization code.
Order number DCN-SWSMD-E

DCN-SW Conference Software Main Module
A platform on which all other Conference software modules run.
Order number DCN-SW

DCN-SWDB-E Conference Software Delegate Database E-code
Can only be used in combination with DCN-SW. Electronic authorization code.
Order number DCN-SWDB-E
