FCS-320-TP Series Conventional Aspirating Smoke Detectors

The FCS-320-TP Series Aspirating Smoke Detectors are active fire detection systems for early fire detection in area and equipment monitoring, as well as for the monitoring of air conditioning units or ducts. They have the latest detection technology. Their resistance to contamination, the temperature compensation of the sensor signals and initialization in relation to air pressure ensure reliable operation even under extreme environmental conditions.

Functions

The aspiration unit takes air samples from the monitoring area through a pipe system with defined air sampling openings and passes the samples to the Detector Module. Depending on the response sensitivity of the used Detector Module, the Aspirating Smoke Detector triggers an alarm when the appropriate smoke density is reached. This alarm is displayed via the alarm LED on the unit and is transmitted to the fire panel. An airflow sensor checks the connected pipe system for breakage and obstruction.

System overview

- Connectable to conventional fire panels
- High deceptive alarm immunity with intelligent signal processing LOGIC-SENS
- Innovative airflow monitoring including single-hole monitoring detects obstruction and breakage
- Initial set-up made easy by automatic initialization
- Easy diagnostics through flash code on the Detector Module or by using the FAS-ASD-DIAG diagnostic software

<table>

The aspiration unit takes air samples from the monitoring area through a pipe system with defined air sampling openings and passes the samples to the Detector Module. Depending on the response sensitivity of the used Detector Module, the Aspirating Smoke Detector triggers an alarm when the appropriate smoke density is reached. This alarm is displayed via the alarm LED on the unit and is transmitted to the fire panel. An airflow sensor checks the connected pipe system for breakage and obstruction.
Intelligent signal processing LOGIC-SENS compares the measured smoke level with known disturbance variables and decides between alarm and deception. For the display and transmission of alarm and faults various delay times can be selected. Each Detector Module is monitored for contamination, signal malfunction and device removal. Malfunctions and certain device states are displayed using various LED flash codes on the Detector Module’s electronics PCB.

Fault messages are reset via the connected fire panel and the reset input or the Reset Module FCA-320-Reset.

There are three different Detector Modules available for the FCS-320-TP Series Aspirating Smoke Detectors. These modules have different response sensitivities:

<table>
<thead>
<tr>
<th>Detector Module</th>
<th>Max. sensitivity (light obscuration)</th>
<th>Levels for selection</th>
</tr>
</thead>
<tbody>
<tr>
<td>DM-TP-50(80)</td>
<td>0.5 %/m (0.8 %/m)</td>
<td>2</td>
</tr>
<tr>
<td>DM-TP-10(25)</td>
<td>0.1 %/m (0.25 %/m)</td>
<td>4</td>
</tr>
<tr>
<td>DM-TP-01(05)</td>
<td>0.015 %/m (0.05 %/m)</td>
<td>4</td>
</tr>
</tbody>
</table>

**Notice**
The sensitivity is based on the measurements during Standard Test Fires (previous measurement in brackets).

The FCS-320-TP2 runs with two Detector Modules. Two air sampling pipe systems can be connected to monitor two areas. When monitoring only one area with two pipe systems, dual-detector dependency may be implemented.

**Model variants FCS-320-TP Series**
The variants FCS-320-TP1 and FCS-320-TP2 are the cost-effective Aspirating Smoke Detectors for universal use with LED displays for operation, malfunction, and alarm (two alarm indications on the FCS-320-TP2).

**Installation/configuration notes**

- For connection to conventional fire panels

**Planning of the pipe system**

- In planning, a distinction is made between area monitoring and equipment monitoring.

- PVC pipes and halogen-free aspiration pipes can be used.
- For equipment monitoring, halogen-free pipes should be used.
- The air sampling pipe system should be arranged such that any fires can be detected at the initial stage.
- The pipe system including air sampling openings must always be symmetrical in design (±10% deviation).
- If structural issues make it impossible to maintain this symmetry, the following conditions apply:
  - The number of air sampling openings and the length of the shortest and longest pipe branch within the pipe system must not exceed a quantity ratio of 1:2.
  - The distance between neighboring air sampling openings on the aspiration pipe must be even (max. deviation ± 20%).
  - The diameters of the air sampling openings are determined separately for each pipe branch. The diameters depend on the total number of air sampling openings in the pipe branch in question.
- Greater distances between the Aspirating Smoke Detector and aspiration pipe are specified for pipes with a 40 mm diameter.
- Depending on the geometrics of the area, the I-, U-, M- or double U-pipe system is utilized.

**Notice**
Take notice when planning that the fans of the Aspirating Smoke Detectors produce a noise level of 45 dB(A).
For a faster detection, it is best to select several short branches rather than a few long branches (U and double-U pipe systems preferable).

- Bends are preferable to angles in the event of directional changes.
- In order to increase transport speed in critical application areas, the fan voltage can be increased from 6.9 V to 9 V.

### Planning limitations
- Pipe length between two air sampling openings:
  - Minimum 4 m (0.1 m with Simplified Pipe Planning)
  - Maximum 12 m.
- The maximum monitoring area per air sampling opening corresponds to the maximum monitoring area of point-type detectors according to valid planning guidelines.
- Maximum of 32 air sampling openings per pipe system
- Max. pipe length / max. total monitoring area per pipe system:
  - 300 m / 2880 m² (VdS-compliant)
  - With two Detector Modules: 2*280 m / 5760 m²

### Aspiration pipe planning
- Aspiration pipe systems are constructed according to planning specifications with the common pipe components as well as components for special applications, e.g. Water Separator or Detonation Safety Barrier.
- All borings for the smoke aspiration systems are made to a diameter of 10 mm and the exact aspiration openings are implemented by means of the patented Aspiration Reducing Film Sheets. For each aspiration hole a Aspiration reducing Film Sheet with corresponding punch diameter and Marking Tape must be provided.

**Notice**
For applications in areas where a blowing-out system is necessary (e.g. low-temperature areas or where high levels of dust accumulate), special suction reducers with plastic clips are available as separate items.

For further information on the following aspects of FCS-320 planning, please refer to the operation guide “FCS-320 Series Aspirating Smoke Detectors LSN improved version” (product ID F.01U.130.926):
- Specifying the sensitivity
- Standard planning in line with VdS
- Planning with long pipe feed lines
- Planning for high-rise warehouses
- Simplified Planning

### Parts included

Conical duct connections for Ø 25 mm

• Aspiration pipe 1 pipe / 2 pipes
• Air return 1 pipe

Cable bushings 5 x M 20 and 2 x M 25
Dimensions (W x H x D) 200 x 292 x 113 mm
Housing material Plastic (ABS)
Housing color Papyrus white, RAL 9018
Weight Approx. 1.5 kg

Environmental conditions
Protection class as per EN 60529 IP 20
Permissible temperature range
• FCS-320-TP Series Aspirating Smoke Detectors -20 °C to +60 °C
• Pipe system PVC 00 °C to +60 °C
• Pipe system ABS -40 °C to +80 °C
Permissible relative humidity (non-condensing) 10 to 95 %

Special features
Acoustic power level 45 dB(A)
Response sensitivity max. light obscuration
• Detector Module DM-TP-50(80) 0.5 %/m (0.8 %/m)
• Detector Module DM-TP-10(25) 0.1 %/m (0.25 %/m)
• Detector Module DM-TP-01(05) 0.015 %/m (0.05 %/m)
Service life of the fan (12 V) 43,000 hrs at 24 °C

Ordering information
FCS-320-TP1 Conventional Aspirating Smoke Detectors
Order number FCS-320-TP1
FCS-320-TP2 Conventional Aspirating Smoke Detectors
Order number FCS-320-TP2

Accessories
DM-TP-01(05) Detector Module
for TITANUS Basic Devices PRO-SENS® TP-1 A and TP-2 A, with max. sensitivity of 0.015 %/m (0.05 %/m) light obscuration
Order number DM-TP-01(05)

FAS-ASD-DIAG Diagnostic Software
The FAS-ASD-DIAG Diagnostic Software enables reading out all stored device data and gives advices to remove failures.
Including connection cable for USB interface and diagnosis tool with an infrared interface.
Order number FAS-ASD-DIAG

FCA-320-Reset Reset Module
Reset module for FCS-320-TP1, FCS-320-TP2 or FCS-320-TM
Order number FCA-320-Reset

MT-1 Device Mounting
Order number TITANUS MT-1 mount

FCS-320-IK Installation Kit
Installation kit for mounting of FCA-320-Reset modules into FCS-320-TP1 or FCS-320-TP1
Order number FCS-320-IK

Test Pipe
Order number RAS test pipe

Test Adapter
Order number RAS test adapter

AF-BR Marking Tapes for Aspiration Reducing Film Sheets
Price per piece, DU 10 pieces
Order number TITANUS AF-BR

AF-2.0 Aspiration Reducing Film Sheets 2.0 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-2.0

AF-2.5 Aspiration Reducing Film Sheets 2.5 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-2.5

AF-3.0 Aspiration Reducing Film Sheets, 3.0 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-3.0

AF-3.2 Aspiration Reducing Film Sheets, 3.2 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-3.2

AF-3.4 Aspiration Reducing Film Sheets, 3.4 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-3.4

AF-3.6 Aspiration Reducing Film Sheets, 3.6 mm
Price per piece, DU 10 pieces
Order number TITANUS AF-3.6

DM-TP-10(25) Detector Module
for TITANUS Basic Devices PRO-SENS® TP-1 A and TP-2 A, with max. sensitivity of 0.10 %/m (0.25 %/m) light obscuration
Order number DM-TP-10(25)

AF-BR Marking Tapes for Aspiration Reducing Film Sheets
Sheets
Price per piece, DU 10 pieces
Order number TITANUS AF-BR
AF-3.8 Aspiration Reducing Film Sheets, 3.8 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-3.8

AF-4.0 Aspiration Reducing Film Sheets, 4.0 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-4.0

AF-4.2 Aspiration Reducing Film Sheets, 4.2 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-4.2

AF-4.4 Aspiration Reducing Film Sheets, 4.4 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-4.4

AF-4.6 Aspiration Reducing Film Sheets, 4.6 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-4.6

AF-5.0 Aspiration Reducing Film Sheets, 5.0 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-5.0

AF-5.2 Aspiration Reducing Film Sheets, 5.2 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-5.2

AF-5.6 Aspiration Reducing Film Sheets, 5.6 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-5.6

AF-6.0 Aspiration Reducing Film Sheets, 6.0 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-6.0

AF-6.8 Aspiration Reducing Film Sheets, 6.8 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-6.8

AF-7.0 Aspiration Reducing Film Sheets, 7.0 mm
Price per piece, DU 10 pieces
Order number TITANUSAF-7.0
