

One family. One standard.
Innumerable security
solutions. DS7000 Line
intrusion control panels.

Security Systems

Security you can rely on.

BOSCH

Protect your assets.

Every business depends heavily on its assets, so it's worth thinking about reliable protection. You can't choose when or where an intrusion will occur, but you can now choose your level of protection.

The series for any size of property

The Bosch DS7000 Line offers a range of effective intrusion control panels for everyone – even private households and small to midsize firms. The entry-level DS7220 V2, the midsize DS7240 V2 and large-scale DS7400 Xi all come with the latest technology, superb flexibility and an excellent price/performance ratio.

More security, less time and money.

The modular design means that the Bosch DS7000 Line can be upgraded effortlessly to suit changing needs. Existing infrastructures can be used for the future, making it an easy and cost-effective way of upgrading. And the series comes with one single programming software for all panels, meaning less training is required.

What's more, a comprehensive range of standardized accessories for all models in the series caters for your every wish - there's no need to handle and store specific accessories for each model.

Easy to use

The software has been optimized and the operating elements redesigned so that the systems are guaranteed to impress down to the very last detail. The systems can be connected to a monitoring center, while simple remote diagnostics and maintenance ensure greater cost-effectiveness and protect your investment long into the future.

8 good reasons to choose the DS7000 Line.

- A range of high-performance and flexible security products for any size of property
- User-friendly operation
- Same training for all panels and software
- Complementary accessories ensure low warehousing costs and simple logistics
- Connection of wired and wireless elements to all panels
- Simple remote diagnostics and maintenance
- Alarm verification function prevents unnecessary interventions
- Access control module lets you control entry effectively

Whatever size your property,
the DS7000 Line is
the system of choice.

DS7220 V2. Security isn't a question of size.

The DS7220 V2 is designed for private households and small businesses. It features up to 24 wired and wireless zones. Two partitions can be defined.

DS7240 V2. At the center of security.

The DS7240 V2 is ideal for small to midsize businesses looking to increase their security. Though technically similar to the DS7220 V2, this model features four partitions and up to 40 wired and wireless zones.

DS7400 Xi. The “Big Brother” of security.

With an impressive 248 alarm zones and up to 112 wireless zones, the DS7400 Xi really is the front-runner with conventional and multiplex technologies when it comes to security systems.
