## Release Letter

Product:	<b><i>DIVAR IP all-in-one 7000 generation 3 Family (DIP-73*)</i></b>
Version:	<b><i>Installer for BVMS 10.1.1</i></b>

### 1. General

The Installer combines a number of software components, which are applicable to the above-mentioned product(s). It can be used for initial software installation or as an upgrade of an earlier version, which is already installed on the system.

### 2. Restrictions; Known Issues

- Access to the administrative *BVRAdmin* account is necessary in order to install software packages.

### 3. New subcomponent software versions

- BVMS 10.1.1
- Video Recording Manager 3.83.0021
- Video Streaming Gateway 7.2.0.44
- Transcoding Service 07.10.0037

### 4. New Features

#### **BVMS**

- New Video Management System features are listed in the Bosch VMS release notes.

#### **VRM**

- New VRM features are listed in the VRM release notes.

### 5. Applied Changes / Bug Fixes

N/A – initial version

## 6. Installation Notes

### ***Initial system setup***

DIVAR IP all-in-one 7000 3<sup>rd</sup> generation products allow for software installation packages to be imported directly during initial system setup. The following steps have to be performed in order to import a custom software installation package on a DIVAR IP all-in-one 7000 3<sup>rd</sup> generation video management appliance:

- Download and unzip the Installer archive from <http://www.boschsecurity.com>
- Copy the BoschAppliance folder onto a USB drive (root level)
- Connect the USB drive to the DIVAR IP all-in-one 7000 system during initial setup
- Proceed with the system setup until the Software Center screen is shown
- After mode-selection, choose the software version that shall be installed on the system

### ***Upgrade***

N/A – initial version

#### Notes:

- During initial boot and installation, the system must be connected to a network.

## 7. History

*N/A – initial version*
