MIC IP starlight 7100i

The MIC IP starlight 7100i camera is an advanced PTZ surveillance platform for mission-critical applications. With starlight imaging technology and excellent low-light sensitivity, the camera is the perfect solution for robust and high-quality imaging needs. The camera’s ruggedized design meets customer expectations in demanding environments that exceed the capabilities of conventional IP cameras. Even in installations subject to harsh shock/vibration conditions and/or extreme weather, the camera provides high-quality video images.

The camera is the ideal choice for:

- Transportation: highways, bridges/tunnels, and ports
- Critical infrastructure: power generation/transmission, refineries/pipelines, and mining
- High-security: government facilities and data centers

The table that follows identifies the differences between the basic models and the enhanced models.

<table>

**Functions**

**Exceptional low-light performance**
The latest sensor technology combined with the sophisticated noise suppression results in an exceptional sensitivity in color. The low-light performance is so good that the camera continues to provide excellent color performance even with a minimum of ambient light.

**High dynamic range**
The dynamic range of the camera is outstanding and is obvious in real-world performance comparisons. In extended dynamic range mode, the camera uses an electronic shutter to capture four images with different exposure time and reproduce a high-contrast frame. The result is that you can view details in both the bright areas (highlights) and the dark areas (shadows) of a scene at the same time. You can easily distinguish objects and features (for example, faces) with bright backlight.

**Ruggedized design for extreme applications**
The camera is designed to last in surveillance applications that are beyond the mechanical capabilities of conventional positioning systems. The entire metal body is anodized and has been engineered to withstand high-impact, low-frequency vibration. The camera models comply to IK10 rating for impact resistance and to the IEC 60068 standards applicable to vibration and shock. The camera has a closed-loop positioning system. The system allows the camera to maintain its position under continuous vibration or after an extreme shock event, even without homing or pre-position calibration.

The camera benefits from Bosch domain knowledge in material engineering and coatings. As a result, the superior metallurgy and the finish of the camera provide unprecedented protection against corrosion. The camera has been tested and meets the ISO 12944:6 standard C5-M - very high (marine) on Aluminum Housing Components.

**Defroster on the viewing window**
Note: This feature is available on enhanced models only.
For installations in environments where ice build-up or condensation is a possibility, the enhanced MIC models have an automatic defrosting function. The inside of the camera window has a transparent coating that puts heat directly on the glass. The heat on the glass helps to decrease and to prevent a build-up of ice as well as condensation on the camera window.

Based on the same technology used to de-ice aircraft windscreens, the defroster can melt 1 cm (0.4 in.) of accumulated ice in five minutes in environments as cold as -25 °C (-13 °F). The defroster starts automatically at <= 5 °C (41 °F). Even in very cold environments, where other cameras suffer from frosted windows, the enhanced MIC models let you see more and see better.

Both the defroster and the IP67 kit, correctly installed on the connectors in the camera base, help to decrease condensation on the camera window.

**Robust design rated to an industry-leading IP68, Type 6P, IK10**
Subjected and certified to rigorous dust and immersion tests (IP68, Type 6P) and impact test (IK10), MIC cameras are perfectly suited for installation in even the most unforgiving environments. Anodized aluminum housing and robust, powder coat paint give unequalled corrosion protection to each MIC camera. Reliable O-ring seals completely protect the internal components from the external environment, meaning that there is no need to pressurize the camera. To guarantee unit integrity, the factory tests each MIC camera for leaks before shipping.

**Pan and tilt drive mechanism**
The pan and tilt mechanism is a ruggedized, direct-drive system. The brushless motors directly control the pan and tilt movement using a finely-tuned gear train designed to minimize backlash and support continuous operation without significant wear and tear.

**Note**: The anti-backlash drivetrain is available on enhanced models only.
With a full 360° continuous rotation pan and 290° tilt control (on upright models without illuminators) and super-quick pan (120°/second) and tilt (90°/second) for exceptional viewing capability, the camera outperforms other cameras in its class.

**Snap to zoom**
Drawing a box in the image will trigger the camera to zoom to the correct position.

**Dual-mode illumination**
The MIC illuminator accessory (sold separately) has IR LEDs and White light LEDs. The illuminator is field-installable.

**Note**: The cameras in this product family are compatible with MIC-IL-x400 models only. The distances and the performance depend on the environmental light conditions.

The following table identifies the application for each type of LED.

<table>
<thead>
<tr>
<th>Application</th>
<th>Type of illuminator</th>
</tr>
</thead>
<tbody>
<tr>
<td>Close-range illumination</td>
<td>940 nm IR LEDs</td>
</tr>
<tr>
<td>Long-range detection</td>
<td>850 nm IR LEDs</td>
</tr>
<tr>
<td>Identification and deterrent</td>
<td>White light LEDs</td>
</tr>
</tbody>
</table>

The MIC camera can steer the IR beam dynamically to match the illumination intensity with the camera’s field of view according to the zoom level.
Beam intensity is controlled automatically or manually, depending on user preference. Decreasing intensity reduces overexposure.

The patented, integrated Constant Light technology delivers a consistent level of illumination performance throughout the life of the product, even in fluctuating temperatures.

White light mode allows operators to capture full scene details in color or use the light as a deterrent effect.

**H.265 high-efficiency video encoding**
The camera is designed on the most efficient and powerful H.264 and H.265/HEVC encoding platform. The camera is capable of delivering high-quality and high-resolution video with very low network load. With a doubling of encoding efficiency, H.265 is the compression standard of choice for IP video surveillance systems.

**Intelligent streaming**
Smart encoding capabilities, together with Intelligent Dynamic Noise Reduction technology and analytics, reduce the bandwidth consumption to extremely low levels. Only relevant information in the scene, like motion, or objects found with the analytics, need to be encoded.

The camera is capable of quad streaming which allows the camera to deliver independent, configurable streams for live viewing, recording, or remote monitoring via constrained bandwidths.

**Recording and storage management**
Control recording management with the Bosch Video Recording Manager application, or use the local storage and iSCSI targets in the camera directly without any recording software.

Use a memory card of a maximum of 2 TB for recording “at the edge” or for Automatic Network Replenishment (ANR) technology to improve the reliability of the recording.

Pre-alarm recording in RAM reduces bandwidth consumption on the network and extends the effective life of the memory card.

Note: The memory card feature is available for enhanced models only.

**Intelligent Video Analytics on the edge**
The camera includes the latest release of Intelligent Video Analytics application for use on pre-positions. Designed for mission-critical applications, the video analytics can reliably detect, track, and analyze moving objects while suppressing unwanted alarms from spurious sources in the image, even in harsh weather conditions.

Advanced tasks like multiple line crossing, loitering, idle / removed object detection, crowd density estimation, occupancy and people counting are available for live alarming and forensic search. Object filters based on size, speed, direction, aspect ratio, and color can be defined.

A simplified calibration mode reduces installation time significantly, because you only need to enter the installation height once for each camera, independent of pre-positions.

After the camera is calibrated, the analytics engine can automatically classify objects as upright person, car, bike, or truck.

**Support for specific use cases**
Intelligent Video Analytics 8.10 offers easy setup by providing optimal default values for several applications. Calibrate the camera, then simply select the desired use case and adapt the offered alarm fields and lines to your field of view. This is available for the following scenarios:

- Intrusion detection (smaller area, single alarm field)
- Intrusion detection (long distance, 2 alarm fields must trigger)
- People counting
- Traffic monitoring (automatic incident detection with wrong way detection, pedestrian detection, slow vehicles, stopped vehicles and dropped objects)
- Traffic monitoring (wrong way detection)

**Video Analytics while camera is moving**
Outside of pre-positions and even while the PTZ camera is moving, whether on guard tours or manually, the Intelligent Video Analytics application can detect and start alarms when objects are in alarm fields. These alarm fields are defined once across all PTZ camera views. The camera can automatically trigger an alarm if any part of a field within the camera’s view becomes active while on a guard tour sweeping across the monitored areas.

**Camera Trainer**
Based on examples of target objects and non-target objects, the Camera Trainer program uses machine learning to allow the user to define objects of interest and generate detectors for them. In contrast to the moving objects that the Intelligent Video Analytics application detects, the Camera Trainer program detects both moving and non-moving objects and classifies them immediately. Using Configuration Manager, you can configure the Camera Trainer program using both live video as well as recordings available through the respective camera. The resulting detectors can be downloaded and uploaded for distribution to other cameras.

A free of charge license is required to activate the Camera Trainer program.

**Intelligent Tracking**
When the Intelligent Video Analytics application in the camera detects objects or individuals, the camera can automatically activate the Intelligent Tracking feature, which controls the pan/tilt/zoom actions of the camera to track objects and keep them in view.
The newest generation of the Intelligent Tracking feature ensures smoother camera motion for more comfortable viewing and more reliable tracking of objects even under challenging scenes. Areas with potentially interfering background motion (moving trees, pulsating lights, and busy roads) can be masked out. The camera supports 2 Intelligent Tracking modes:

- **Auto mode:** In this mode, the camera follows any object that has triggered an alarm in the Intelligent Video Analytics application. This mode is most useful for scenarios where the alarm cases can be clearly defined, for example, when no motion is expected at all.
- **Click mode:** In this mode, users can click on any object detected by the Intelligent Video Analytics application to enable the camera to track the movement of the selected object. This mode is most useful for scenarios where normal scene activity is expected.

**Image Stabilization**

Cameras on unstable mounts can move sufficiently to change the field of view. The higher the zoom value, the larger the change of the field of view. This change can make images unusable. The camera has an Image stabilization algorithm that lets the camera sense continuous vibration. If it detects vibration, the camera corrects the shaky video in the vertical axis and the horizontal axis. The result is excellent image clarity and a stable field of view on the monitor. The image stabilization function is important to eliminate movement that unstable camera mounts cause.

**Simple set-up**

The camera has a very intuitive user interface that allows fast and easy configuration. Configurable scene modes are provided with the best settings for a variety of applications.

- **Standard**
  This mode is optimized for most standard scenes both indoor and outdoor.
- **Sensitivity boost**
  This mode provides maximum sensitivity in low light scenes by using longer exposure times, resulting in bright images even in extreme low light.
- **Fast movement**
  This mode is used for monitoring fast moving objects like cars in traffic scenes. Motion artifacts are minimized and the image is optimized for a sharp and detailed picture in color and monochrome.
- **Vibrant**
  This mode provides a more vivid image with increased contrast, sharpness, and saturation.
- **Color Only (Traffic)**
  In this mode, the camera does not switch to monochrome mode at low light levels. The mode is optimized to minimize motion artifacts and to capture the color of vehicles/pedestrians and traffic lights, even at night, for scenarios such as city surveillance and traffic monitoring.

**Illuminator**

This mode gives optimized performance when using the MIC illuminator accessory.

**Custom mode #1** and **Custom mode #2** give users the option to customize 2 scene modes of their own.

**Auto Exposure (AE) region and Focus region**

With the Auto Exposure (AE) function, the camera computes the lighting condition of the entire scene. Then the camera determines the optimum level of iris, gain, and shutter speed.

In AE region mode, users can designate a specified area of the scene, based on pre-positions. The camera computes the lighting condition of the specified area. Then the camera determines the optimum level of iris, gain, and shutter speed to get an image.

Focus region mode, unlike normal auto focus mode, allows users to focus on a specified area of the scene.

**Data security**

Special measures are necessary to ensure the highest level of security for device access and data transport. On initial setup, the camera is only accessible over secure channels. You must set a service-level password in order to access camera functions. Web browser and viewing client access can be protected using HTTPS or other secure protocols that support state-of-the-art TLS 1.2 protocol with updated cipher suites including AES encryption with 256 bit keys. No software can be installed in the camera, and only authenticated firmware can be uploaded. A three-level password protection with security recommendations allows users to customize device access. Network and device access can be protected using 802.1x network authentication with EAP/TLS protocol. Superior protection from malicious attacks is guaranteed by the Embedded Login Firewall, on-board Trusted Platform Module (TPM) and Public Key Infrastructure (PKI) support.

The advanced certificate handling offers:

- **Self-signed unique certificates automatically created when required**
- **Client and server certificates for authentication**
- **Client certificates for proof of authenticity**
- **Certificates with encrypted private keys**

**Software sealing**

After camera configuration is set and should not be changed, system administrators can enable software protection that seals the camera configuration. Any change of the sealing status and any change to static configuration, accidentally or intentional, will break the seal. The camera then sends an alarm message that the video management system can use to start an appropriate alarm scenario. The camera creates a separate log file of all changes that have an effect on the sealing status.
System integration and ONVIF conformance
The camera conforms to the specifications for ONVIF Profile S, ONVIF Profile G, and ONVIF Profile M. (ONVIF is the acronym for Open Network Video Interface Forum.) For H.265 configuration, the camera also supports Media Service 2, which is part of ONVIF Profile T. Compliance with these standards guarantees interoperability between network video products, regardless of manufacturer. Third-party integrators can easily access the internal feature set of the camera for integration into large projects. For more information, see the Bosch Integration Partner Program (IPP) website (ipp.boschsecurity.com).

Ease of installation
The camera has been designed for quick and easy installation, a key feature from Bosch IP video security products. The camera supports mounting in upright, inverted, or canted orientation. The on-site canting functionality lets installers tilt down the upper section of the camera at a 35° angle. At this angle, operators can see the scene directly below the camera.

Power options
The camera can be powered by a network compliant to High Power-over-Ethernet using a Bosch model of High PoE Midspan (sold separately). With this configuration, only a single cable connection (Cat5e/Cat6 Shielded Twisted Pair (STP)) is needed to view, to power, and to control the camera. For maximum reliability, the camera can operate with a redundant power system of a High PoE Midspan and a separate 24 VAC power source connected simultaneously. If either the High PoE or 24 VAC power source fails, the camera seamlessly transitions to the remaining power source. The 60 W midspan can supply power to models without an illuminator accessory. The 95 W midspans can supply power to all models of MIC IP starlight 7100i, including models with the illuminator accessory. The camera can also accept a standard 24 VAC power source if a High PoE network interface will not be used. User-supplied wiring must be in compliance with electrical codes (Class 2 power levels). Refer to the table in the Installation/configuration notes section for more information.

Camera Diagnostics
The camera has several built-in sensors / advanced diagnostics that display warnings on the camera’s OSD about the health of the camera. The diagnostics log records the events such as:
- High vibration - the acceptable level of acceleration forces was exceeded
- Total hours of camera operation
- Illuminator aging history

Certain events also appear on the camera’s OSD. These diagnostic records are available for the installation or service technician to review.

Unsurpassed reliability
As with all Bosch products, the camera is designed using the industry’s best design process and is subjected to the most stringent testing standards such as HALT (highly accelerated life testing), which pushes the limits of products to ensure reliability throughout their lifetime.

Project Assistant
Project Assistant by Bosch is the market’s most easy-to-use app for initial installation and basic configuration of IP cameras. Off-site and without connection to the camera, basic configurations can be created and then shared with colleagues. On-site, these pre-configurations can be pushed onto the camera, making the installation procedure easier and less time-consuming. Cameras previously configured can be integrated as well. The app allows easy viewing and adjustment of the camera’s field of view. The app automatically generates a comprehensive report of the commissioned cameras.

Regulatory information
For a full list of all related certifications/standards, refer to the Product Tests Report, available on the online catalog, on the Documents tab of the product page for your device. If the document is unavailable on the product page, contact your sales representative.

**Mounting Bracket Options**

Bosch designed MIC IP 7100i cameras for use in outdoor applications. In an enclosed installation area (for example, in a foundry, near a furnace, etc.), temperatures outside of the camera might exceed +65 °C (+149 °F). If you install a camera in an enclosed area, make sure that the operating temperature of the camera is a maximum of +60 °C (+140 °F). Make sure that air circulates around the camera to supply cooling.

The following figure identifies the optional mounting brackets for MIC cameras. Refer to the datasheets of each bracket for details. Some brackets may not be available in all regions.

For more options, refer to the MIC IP cameras Accessory Quick Selection Guide.

**Wiring requirements for outdoor installation**

- Ethernet cable must use shielded cable such as F/UTP shielded cable with twisted pairs (often referred to as FTP) or S/UTP braided shield with twisted pairs (often referred to as STP).
- Make sure that the routing of external wiring is through a permanently earthed metal conduit.
- Bosch highly recommends that you use surge/lightning protection devices (sourced locally) to protect network and power cables and the camera installation site.

Miscellaneous

Sectors 4, 6, 8, 9, 12, or 16 user-selectable, independent Sectors, each with 20 characters per Title
Privacy Masks 32 individually configurable Privacy Masks; maximum 8 per Pre-position; programmable with 3, 4 or 5 corners; selectable color of Black, White, Gray, or Mosaic, as well as an “Auto” option in which the camera selects the most prevalent of the three colors in the background scene as the pattern color.
Virtual Masks 24 individually configurable Virtual Masks to hide parts of the scene (background motion such as moving trees, pulsating lights, busy roads, etc.) which should not be considered for flow analysis to trigger Intelligent Tracking.
Pre-positions 256 Pre-positions, each with 20 characters per Title
Guard Tours Custom Recorded Tours - two (2), total duration 30 minutes.
Pre-position tour - one (1), consisting of up to 256 scenes consecutively, and one (1) customized with up to 256 user-defined scenes

Supported Languages
English, Czech, Dutch, French, German, Italian, Polish, Portuguese, Russian, Spanish, Japanese, Chinese

Alarm control
Rules-based logic supports basic and complex pre-defined user-specified commands. In its most basic form, a “rule” could define which input(s) should activate which output(s).

Washer Pump Interface
Control functions integrated. Alarm/Washer Interface Unit (MIC-ALM-WAS-24, sold separately) provides electrical interface to a washer pump device (user-supplied).

Camera status monitoring
Integrated sensors monitor operational status such as internal temperature, humidity level, incoming voltage level, vibration, and shock events.

Diagnostics
Various status conditions are tracked in the internal diagnostic log. Critical fault conditions will also be displayed on screen.

Network
Standard/Video compression
H.265, H.264 (ISO/IEC 14496), M-JPEG, JPEG

Streaming
Four (4) streams: Two (2) configurable streams in H.264 or H.265. One (1) I-frames-only stream based on first stream. One (1) M-JPEG Stream

#### Electrical

- **Input voltage**: 24 VAC, 50/60 Hz \(\text{High Power over Ethernet 56VDC nominal}\)
- **Power Consumption (typical), without illuminator**: 40 W
- **Power Consumption (typical), with illuminator**: 70 W
- **Current consumption, 24 VAC**: -3.15A
- **Current consumption, High PoE**: -1.5A
- **Redundant configuration**: Connect both a High PoE Midspan and a separate 24 VAC power source. If either power source fails, the camera automatically switches to the other power source.
- **Surge protection**: Built-in surge protection for power, data, and network interfaces (Refer to the A&E Specifications for details.)

#### Communications / Software Control

- **Camera Setup/Control**: Via Internet Explorer web browser version 7.0 or later, Bosch Configuration Manager, BVMS (BVMS), Bosch Video Client (BVC), or support for third party software
- **Software Update**: Network firmware upload
- **Serial protocols**: Bosch OSRD, Pelco P/D, Forward Vision, and Cohu

#### Local Storage

- **Memory card slot**: User-supplied full SD card (maximum 2 TB) on enhanced models only
  - Recommended: Industrial SD cards from Western Digital (sold by Bosch)

#### User Connections

- **Accessory Interface/Control Data**: RS-485, simplex, user-selectable baud rate or auto-baud
  - Used to communicate with optional Alarm/washer interface box (MIC-ALM-WAS-24) or with Bosch OSRD, Pelco P/D, Forward Vision, and Cohu serial protocols.

#### Chassis ground

- **Ground wire with connector lug**

#### Power, Camera

- **Input voltage, without illuminator**: RJ45 connector to 60 W High PoE Midspan (NPD-6001B) or 95 W High PoE Midspan (NPD-9501A or NPD-9501-E), or 24 VAC, 50/60 Hz; Female-to-female RJ45 coupler included
- **Input voltage, with illuminator**: RJ45 connector to 95 W High PoE Midspan (NPD-9501A or NPD-9501-E)* or 24 VAC, 50/60 Hz; Female-to-female RJ45 coupler included
- **Power, Camera**: 24 VAC (power supply)
- **Video and Control**: RJ45 100BASE-TX Ethernet; RS-485 half-duplex 57600 baud (dedicated for MIC-ALM-WAS-24)

* Must purchase NPD-9501A or NPD-9501-E in order to use the High PoE solution.

#### Audio

- **Compression**: G.711, AAC, and L16 (live and recording)
- **Signal-to-Noise Ratio (SNR)**:
  - Audio-in: 47 dBA (A-weighting)
  - Audio out: 50 dBA (A-weighting)
- **Mode**: Two-way, full duplex audio communication
- **User connections**:
  - Line in: 15k ohm typical, 1.0Vrms, max
  - Line out: 0.8Vrms at 12K ohm, typical

#### Environmental

- **The customer is responsible for making sure that the installation complies with the specified stresses that follow.**

#### Note: Unit includes internal heater and fan.

- **Ingress Protection Rating/Standard**: IEC 60529 IP66 / IP68 / Type 6P (dust and immersion) when installed on a MIC-DCA, or on a MIC wall mount with a MIC-SCA.
**External Mechanical Impact (IK Code / Impact rating)**

**Wind Load**

Sustained winds up to 161 kph (100 mph)
- Upright or inverted camera with illuminator will hold its position in gusts up to 241 kph (150 mph).
- Canted camera with illuminator will hold its position in gusts up to 257 km/h (160 mph).

**Coefficient of Drag:**
- Without illuminator 0.91
- With illuminator 0.946a

**Effective Projected Area (EPA):**
- Camera + DCA: 0.0725 m² (0.78 ft²)
- Camera + DCA + illuminator: 0.0854 m² (0.92 ft²)

**Vibration**

IEC 60068-2-6: 10-150 Hz, 1.0G (0.5G on canted unit), 10m/s², 20 Sweeps
NEMA TS 2 Section 2.2.8: 5-30 Hz, 0.5G
MIL-STD-167-1A

**Shock**

IEC 60068-2-27, Test Ea: Shock, half sine impulse, 11 ms, 45G (20G on canted unit), non-repetitive shocks (three shocks in each axis and in each direction)

**Power Service Transients**

NEMA TS2 Section 2.2.7.2

**Power Interruption**

NEMA TS2 Section 2.2.10

**MIL-STD-810 Military Standard Test Methods**

**MIL-DTL-901 Military Standard Test Methods**

MIL-DTL-901E when subjected to Grade B, Class I, Type A, lightweight shock testing;
MIL-DTL-901E when subjected to Grade B, Class I, Type A, medium weight shock testing

**Salt Mist Spray (Corrosion Test)**

ISO 12944-6: C5-M (High); Aluminum Housing Components

**Construction**

**Dimensions (W x H x D)**

Without illuminator accessory or sunshield: **Upright, Inverted:** 287.93 mm x 400.34 mm x 210.65 mm (11.34 in. x 15.76 in. x 8.29 in.)
**Canted:** 260.25 mm (10.2 in.) x 374.5 mm (14.7 in.)

**Weight**

8.7 Kg (19.2 lb)

**Window**

Flat glass (with defroster on enhanced models only)
Defroster starts automatically at <= 5 °C (41 °F).

**Construction Material**

Anodized cast aluminum

**Window Wiper**

Integrated, long-life silicone wiper

**Sunshield**

(to prevent sun load in hot climates)
Optional (sold separately)
**Video - MIC IP starlight 7100i**

**Ordering information**

**MIC-7522-Z30BR PTZ 2MP HDR 30x IP68 enhanced black**
Ruggedized PTZ camera; 1080p, 30x, starlight imaging, defroster, SD card slot.
Black (RAL 9005). Sand finish.
Easy install with DCA (sold separately). Optional illuminator (sold separately).
NDAA compliant
Order number MIC-7522-Z30BR | F.01U.359.795

**MIC-7522-Z30WR PTZ 2MP HDR 30x IP68 enhanced white**
Ruggedized PTZ camera; 1080p, 30x, starlight imaging, defroster, SD card slot.
White (RAL 9010). Sand finish.
Easy install with DCA (sold separately). Optional illuminator (sold separately).
NDAA compliant
Order number MIC-7522-Z30WR | F.01U.359.796

**MIC-7522-Z30GR PTZ 2MP HDR 30x IP68 enhanced gray**
Ruggedized PTZ camera; 1080p, 30x, starlight imaging, defroster, SD card slot.
Grey (RAL 7001) color. Sand finish.
Easy install with DCA (sold separately). Optional illuminator (sold separately).
NDAA compliant
Order number MIC-7522-Z30GR | F.01U.359.797

**MIC-7522-Z30B PTZ 2MP HDR 30x IP68 black**
Ruggedized, outdoor PTZ camera; 1080p HD, 30x, starlight imaging, H.265, IVA
Black (RAL 9005). Sand finish.
Easy install with DCA (sold separately). Optional illuminator (sold separately).
NDAA compliant
Order number MIC-7522-Z30B | F.01U.353.588

**MIC-7522-Z30W PTZ 2MP HDR 30x IP68 white**
Ruggedized, outdoor PTZ camera; 1080p HD, 30x, starlight imaging, H.265, IVA
White (RAL 9010). Sand finish.
Easy install with DCA (sold separately). Optional illuminator (sold separately).
NDAA compliant
Order number MIC-7522-Z30W | F.01U.353.589

**MIC-7522-Z30G PTZ 2MP HDR 30x IP68 gray**
Ruggedized, outdoor PTZ camera; 1080p HD, 30x, starlight imaging, H.265, IVA
Grey (RAL 7001) color. Sand finish.
Easy install with DCA (sold separately). Optional illuminator (sold separately).
NDAA compliant
Order number MIC-7522-Z30G | F.01U.353.590

**Accessories**

**MIC-ILB-400 Illuminator, white-IR light, black**
Illuminator accessory for certain MIC IP cameras, IR Light (850 nm/940 nm) + White light LEDs
Black (RAL 9005). Sand finish.
Order number MIC-ILB-400 | F.01U.370.191

**MIC-ILW-400 Illuminator, white-IR light, white**
Illuminator accessory for certain MIC IP cameras, IR Light (850 nm/940 nm) + White light LEDs
White (RAL 9010). Sand finish.
Order number MIC-ILW-400 | F.01U.370.192

**MIC-ILG-400 Illuminator, white-IR light, gray**
Illuminator accessory for certain MIC IP cameras, IR Light (850 nm/940 nm) + White light LEDs
Grey (RAL 7001) color. Sand finish.
Order number MIC-ILG-400 | F.01U.370.193

**NPD-6001B Midspan, 60W, single port, AC in**
60 W indoor midspan for cameras without illuminators
Order number NPD-6001B | F.01U.347.358
F.01U.392.458

**NPD-9501A Midspan, 95W, single port, AC in**
95 W indoor PoE midspan for AUTODOME and MIC cameras
Order number NPD-9501A | F.01U.286.250
F.01U.392.336

**VG4-A-PSU1 PSU, 120VAC, for AUTODOME, MIC7000**
Power supply for AUTODOME 7000, MIC IP cameras without illuminators.
120VAC in, 24VAC out
Order number VG4-A-PSU1 | F.01U.081.593
F.01U.009.667 F.01U.261.377

**VG4-A-PSU2 Power supply, 230VAC, AUTODOME, MIC7000**
Power supply for AUTODOME 7000, MIC IP cameras without illuminators.
230VAC in, 24VAC out
Order number VG4-A-PSU2 | F.01U.009.668
F.01U.096.639 F.01U.097.433 F.01U.081.604 F.01U.261.378

**MIC-ALM-WAS-24 Interface box, alarm, washer pump, 24VAC**
Grey polycarbonate interface box for alarms and washer pump connections for MIC IP cameras
Order number MIC-ALM-WAS-24 | F.01U.286.248

**MIC-DCA-HB Deep conduit mount, M25 holes, black**
DCA mount for MIC7000 family and MIC IP fusion 900i cameras. Aluminum. Two M25 holes for conduit/cable glands.
Black (RAL 9005) color.
Order number MIC-DCA-HB | F.01U.286.244
MIC-DCA-HBA Deep conduit mount, M25 holes, black
Black (RAL 9005) color.
Order number MIC-DCA-HBA | F.01U.303.166

MIC-DCA-HW Deep conduit mount, two M25 holes, white
DCA mount for MIC7000 family and MIC IP fusion 9000i cameras. Aluminum. Two M25 holes for conduit/cable glands.
White (RAL 9010) color.
Order number MIC-DCA-HW | F.01U.286.245

MIC-DCA-HWA Deep conduit mount, M25 holes,white
White (RAL 9010) color.
Order number MIC-DCA-HWA | F.01U.303.167

MIC-DCA-HG Deep conduit mount, two M25 holes, grey
DCA mount for MIC7000 family and MIC IP fusion 9000i cameras. Aluminum. Two M25 holes for conduit/cable glands.
Grey (RAL 7001) color.
Order number MIC-DCA-HG | F.01U.286.246

MIC-DCA-HGA Deep conduit mount, M25 holes, grey
Grey (RAL 7001) color.
Order number MIC-DCA-HGA | F.01U.303.168

MIC-WMB-BD Wall mount bracket, black
Wall mount bracket, black sand finish (RAL9005)
Order number MIC-WMB-BD | F.01U.143.155

MIC-WMB-WD Wall mount bracket, white
Wall mount bracket, white sand finish (RAL9010)
Order number MIC-WMB-WD | F.01U.143.156

MIC-WMB-MG Wall mount for rugged PTZ camera, grey
Wall Mount Bracket.
Grey (RAL 7001) color. Sand finish.
Order number MIC-WMB-MG | F.01U.296.299

MIC-M25XNPT34 Adapter, M25 to 3/4"NPT, stainless steel
Stainless Steel M25 to ¾" NPT thread adapter
Order number MIC-M25XNPT34 | F.01U.301.975

MIC-SPR-BD Wall mount spreader plate, black sand
Aluminum spreader plate suitable for brickwork surface mounting, black sand finish (RAL9005)
Order number MIC-SPR-BD | F.01U.143.164

MIC-SPR-WD Wall mount spreader plate, white sand
Aluminum spreader plate suitable for brickwork surface mounting, white sand finish (RAL9010)
Order number MIC-SPR-WD | F.01U.143.163

MIC-SPR-MG Wall mount spreader plate, grey sand
Aluminum spreader plate suitable for brickwork surface mounting, grey sand finish.
Order number MIC-SPR-MG | F.01U.296.298

MIC-WKT-IR Washer kit, MIC IR
Washer kit for MIC IP starlight 7000i and MIC IP fusion 9000i camera models
Order number MIC-WKT-IR | F.01U.087.283

MIC-7100I-SNSHLD-W Sunshield for MIC 7100i white
Sunshield for MIC IP ultra 7100i camera models
Order number MIC-7100I-SNSHLD-W | F.01U.353.591

Software Options
MVS-FCOM-PRCL License key for serial protocol
Serial Protocol Software License (e-license) for IP Cameras
Order number MVS-FCOM-PRCL | F.01U.314.101

MVC-CT-PTZ License for PTZs
Camera Trainer license for Intelligent Video Analytics 7.10 on PTZ cameras.
Free-of-charge software module.
Order number MVC-CT-PTZ | F.01U.365.079
MVS-FNTCIP NTCIP for moving cameras
NTCIP license for moving cameras
Available in NAM region only.
Order number MVS-FNTCIP | F.01U.329.682
