The MIC inteoX 7100i camera is an advanced PTZ surveillance platform based on an open operating system, driven by OSSA, from Security and Safety Things. With starlight imaging technology and excellent low-light sensitivity, the camera is the perfect solution for robust and high-quality imaging needs for mission-critical applications. The camera's ruggedized design meets customer expectations in demanding environments that exceed the capabilities of conventional IP cameras. Even in installations subject to harsh shock/vibration conditions and/or extreme weather, the camera provides high-quality video images.

The camera is the ideal choice for:

- Transportation: highways, bridges/tunnels, and ports
- Critical infrastructure: power generation/transmission, refineries/pipelines, and mining
- High-security: government facilities and data centers
- Mission-critical applications involving harsh environments that require high-resolution imaging
- Complex scenes with many details under any lighting condition

Intelligent open, flexible, and extendable camera platform

The camera has a powerful, embedded processor with dedicated hardware to support advanced machine learning and neural-network-based Video Analytics. All cameras with this platform have high image quality, built-in Video Analytics, intelligent bitrate management, and the highest levels of data security. The platform also gives you the flexibility to customize your camera to your specific requirements.

The camera platform integrates with the cloud infrastructure of Security and Safety Things for app management across devices. Also, Bosch offers advanced device management and services through the Bosch Remote Portal (https://remote.boschsecurity.com/). From the Bosch Remote Portal you can (remotely):

- Complete initial configuration of your online and connected Bosch devices.
- Update firmware for single or multiple devices.
- Manage certificates through Configuration Manager or the web interface of your camera.

- Open platform that allows third-party apps from the Application store from Security & Safety Things
- Starlight camera technology with excellent low-light sensitivity (color = 0.0047 lx) and High dynamic range (120 dB) (to see details in bright and dark areas simultaneously)
- Flexible streaming capabilities powering three independent streams
- Edge intelligence and object detection even when the camera is moving
- Optional illuminator with multispectral LEDs that distribute IR light uniformly in the field (up to 550 m (1804.50 ft)) to avoid dark spots or an over-illuminated scene
- Installations where downtime is undesired because of high service costs
• Monitor the health of and receive alerts for your connected Bosch devices.
• Connect your Bosch devices to the Security and Safety Things portal for app management.

Functions

Exceptional low-light performance
The latest sensor technology combined with the sophisticated noise suppression results in an exceptional sensitivity in color. The low-light performance is so good that the camera continues to provide excellent color performance even with a minimum of ambient light.

High dynamic range
The dynamic range of the camera is outstanding and is obvious in real-world performance comparisons. In extended dynamic range mode, the camera uses an electronic shutter to capture four images with different exposure time and reproduce a high-contrast frame. The result is that you can view details in both the bright areas (highlights) and the dark areas (shadows) of a scene at the same time. You can easily distinguish objects and features (for example, faces) with bright backlight.

Ruggedized design for extreme applications
The camera is designed to last in surveillance applications that are beyond the mechanical capabilities of conventional positioning systems. The entire metal body is anodized and has been engineered to withstand high-impact, low-frequency vibration. The camera models comply to IK10 rating for impact resistance and to the IEC 60068 standards applicable to vibration and shock.

The camera has a closed-loop positioning system. The system allows the camera to maintain its position under continuous vibration or after an extreme shock event, even without homing or pre-position calibration.

The camera benefits from Bosch domain knowledge in material engineering and coatings. As a result, the superior metallurgy and the finish of the camera provide unprecedented protection against corrosion. The camera has been tested to and meets the ISO 12944-6 standard C5-M · very high (marine) on Aluminum Housing Components.

Defroster on the viewing window
Note: This feature is available on enhanced models only.

For installations in environments where ice build-up or condensation is a possibility, the enhanced MIC models have an automatic defrosting function. The inside of the camera window has a transparent coating that puts heat directly on the glass. The heat on the glass helps to decrease and to prevent a build-up of ice as well as condensation on the camera window.

Based on the same technology used to de-ice aircraft windscreens, the defroster can melt 1 cm (0.4 in.) of accumulated ice in five minutes in environments as cold as -25 °C (-13 °F). The defroster starts automatically at <= 5 °C (41 °F). Even in very cold environments, where other cameras suffer from frosted windows, the enhanced MIC models let you see more and see better.

Both the defroster and the IP67 kit, correctly installed on the connectors in the camera base, help to decrease condensation on the camera window.

Robust design rated to an industry-leading IP68, Type 6P, IK10
Subjected and certified to rigorous dust and immersion tests (IP68, Type 6P) and impact test (IK10), MIC cameras are perfectly suited for installation in even the most unforgiving environments. Anodized aluminum housing and robust, powder coat paint give unequaled corrosion protection to each MIC camera. Reliable O-ring seals completely protect the internal components from the external environment, meaning that there is no need to pressurize the camera. To guarantee unit integrity, the factory tests each MIC camera for leaks before shipping.

Pan and tilt drive mechanism
The pan and tilt mechanisms use ruggedized, all-metal intermeshing gears, which are more resistant to shock and to vibration. Cameras with all-metal gears have a longer operational life than cameras with plastic gears and drive belt systems of rubber. High-efficiency motors with brushless positioning control the pan and tilt movement directly to support continuous operation without significant wear and tear.

Innovative dual spring-loaded gears on the pan and tilt stage reduce backlash and further improve positional accuracy. The spring-loaded gears provide a more stable image compared to belt-driven cameras.

Note: The anti-backlash drivetrain is available on enhanced models only.

Dual-mode Illumination
The MIC illuminator accessory (sold separately) has IR LEDs and White light LEDs. The illuminator is field-installable.

The following table identifies the application for each type of LED.

<table>
<thead>
<tr>
<th>Application</th>
<th>Type of illuminator</th>
</tr>
</thead>
<tbody>
<tr>
<td>Close-range illumination</td>
<td>940 nm IR LEDs</td>
</tr>
<tr>
<td>Long-range detection</td>
<td>850 nm IR LEDs</td>
</tr>
<tr>
<td>Identification and deterrent</td>
<td>White light LEDs</td>
</tr>
</tbody>
</table>

The MIC camera can steer the IR beam dynamically to match the illumination intensity with the camera’s field of view according to the zoom level.
Beam intensity is controlled automatically or manually, depending on user preference. Decreasing intensity reduces overexposure.

The patented, integrated Constant Light technology supplies a consistent level of illumination during the life of the product, even in changing temperatures. White light mode allows operators to capture full scene details in color or use the light as a deterrent effect.

**H.265 high-efficiency video encoding**
The camera is designed on the most efficient and powerful H.264 and H.265/HEVC encoding platform. The camera is capable of delivering high-quality and high-resolution video with very low network load. With a doubling of encoding efficiency, H.265 is the compression standard of choice for IP video surveillance systems.

**More flexibility in streaming capabilities**
The camera has three independent encoder streams. Users can configure each stream individually to change the video resolution and the frame rate. Users have two options:

1. Let the camera deliver what is possible based on its encoding performance across the streams equally.
2. Select one of the three streams to be prioritized, for example, to guarantee “quality of service” for the recording stream.

Users can select the coding standard (H.264/H.265) for each stream.

Each stream also has its own set of 8 encoder profiles that users can configure.

**Recording and storage management**
Control recording management with the Bosch Video Recording Manager application.

**Intelligent Video Analytics on the edge**
The camera includes the latest release of Intelligent Video Analytics application for use on pre-positions.

Designed for mission-critical applications, the video analytics can reliably detect, track, and analyze moving objects while suppressing unwanted alarms from spurious sources in the image, even in harsh weather conditions.

Advanced tasks like multiple line crossing, loitering, idle / removed object detection, crowd density estimation, occupancy and people counting are available for live alarming and forensic search. Object filters based on size, speed, direction, aspect ratio, and color can be defined.

A simplified calibration mode reduces installation time significantly, because you only need to enter the installation height once for each camera, independent of pre-positions.

After the camera is calibrated, the analytics engine can automatically classify objects as upright person, car, bike, or truck.

**Support for specific use cases**
Intelligent Video Analytics 8.10 offers easy setup by providing optimal default values for several applications. Calibrate the camera, then simply select the desired use case and adapt the offered alarm fields and lines to your field of view. This is available for the following scenarios:

- Intrusion detection (smaller area, single alarm field)
- Intrusion detection (long distance, 2 alarm fields must trigger)
- People counting
- Traffic monitoring (automatic incident detection with wrong way detection, pedestrian detection, slow vehicles, stopped vehicles and dropped objects)
- Traffic monitoring (wrong way detection)

With a future-proof design, the camera can tackle new use cases by delivering more reliable detections, more detailed classifications, and thus more insights on what is happening in a scene. Based on the open platform principle, these capabilities are leveraged by Intelligent Video Analytics by Bosch as well as by third-party apps from the Application store from Security and Safety Things.

**Video Analytics while camera is moving**
Outside of pre-positions and even while the PTZ camera is moving, whether on guard tours or manually, the Intelligent Video Analytics application can detect and start alarms when objects are in alarm fields. These alarm fields are defined once across all PTZ camera views. The camera can automatically trigger an alarm if any part of a field within the camera’s view becomes active while on a guard tour sweeping across the monitored areas.

**Camera Trainer**
Based on examples of target objects and non-target objects, the Camera Trainer program uses machine learning to allow the user to define objects of interest and generate detectors for them. In contrast to the moving objects that the Intelligent Video Analytics application detects, the Camera Trainer program detects both moving and non-moving objects and classifies them immediately. Using Configuration Manager, you can configure the Camera Trainer program using both live video as well as recordings available through the respective camera. The resulting detectors can be downloaded and uploaded for distribution to other cameras.

A free of charge license is required to activate the Camera Trainer program.

**Image Stabilization**
Cameras on unstable mounts can move sufficiently to change the field of view. The higher the zoom value, the larger the change of the field of view. This change can make images unusable.

The camera has an Image stabilization algorithm that lets the camera sense continuous vibration. If it detects vibration, the camera corrects the shaky video
in the vertical axis and the horizontal axis. The result is excellent image clarity and a stable field of view on the monitor. The image stabilization function is important to eliminate movement that unstable camera mounts cause.

**Auto Exposure (AE) region and Focus region**

With the Auto Exposure (AE) function, the camera computes the lighting condition of the entire scene. Then the camera determines the optimum level of iris, gain, and shutter speed.

In AE region mode, users can designate a specified area of the scene, based on pre-positions. The camera computes the lighting condition of the specified area. Then the camera determines the optimum level of iris, gain, and shutter speed to get an image.

Focus region mode, unlike normal auto focus mode, allows users to focus on a specified area of the scene.

**Snap to zoom**

Drawing a box in the image will trigger the camera to zoom to the correct position.

**Simple set-up**

The camera has a very intuitive user interface that allows fast and easy configuration. Configurable scene modes are provided with the best settings for a variety of applications.

- **Standard**
  This mode is optimized for most standard scenes both indoor and outdoor.

- **Sensitivity boost**
  This mode provides maximum sensitivity in low light scenes by using longer exposure times, resulting in bright images even in extreme low light.

- **Fast movement**
  This mode is used for monitoring fast moving objects like cars in traffic scenes. Motion artifacts are minimized and the image is optimized for a sharp and detailed picture in color and monochrome.

- **Vibrant**
  This mode provides a more vivid image with increased contrast, sharpness, and saturation.

- **Color Only (Traffic)**
  In this mode, the camera does not switch to monochrome mode at low light levels. The mode is optimized to minimize motion artifacts and to capture the color of vehicles/pedestrians and traffic lights, even at night, for scenarios such as city surveillance and traffic monitoring.

- **Illuminator**
  This mode gives optimized performance when using the MIC illuminator accessory.

**Custom mode #1** and **Custom mode #2** give users the option to customize 2 scene modes of their own.

**Data security**

Special measures are necessary to ensure the highest level of security for device access and data transport. On initial setup, the camera is only accessible over secure channels. A three-level password protection with security recommendations lets users customize device access. Unsecure ports are disabled. Firmware updates are only possible with Bosch-signed firmware files. The Embedded Login Firewall improves robustness against Denial of Service (DoS) attacks. The software sealing functionality can detect changes in a configuration. HTTPS or other secure protocols prevent access to the web browser and the viewing client. With the feature of secure and verified boot, you can trust all executed code in the device.

TPM functionality is provided by "Secure Element" (dedicated AES/DES/PKI crypto co-processor) that:

- Is independently certified with Assurance Level (EAL) 6+ based on Common Criteria for Information Technology Security Evaluation [out of 7 levels according to ISO/IEC 15408]
- Has cryptography with a maximum of 4096 bit RSA keys for TLS (maximum version 1.3) and device identity (Future-proof until 2031 and beyond) [according to NIST Special Publication 800-57, part 1, page 56]

The advanced certificate handling offers:

- Self-signed, unique certificates automatically created when required
- Client and server certificates for authentication
- Client certificates for proof of authenticity
- Certificates with encrypted private keys
- Only trusted and authenticated third-party apps can be uploaded. A safe sandbox environment enables the secure execution of trusted third-party software.
- There is full transparency on individual app requirements to access system resources (listed in the Application store from Security and Safety Things).

**Software sealing**

After camera configuration is set and should not be changed, system administrators can enable software protection that seals the camera configuration. Any change of the sealing status and any change to static configuration, accidentally or intentional, will break the seal. The camera then sends an alarm message that the video management system can use to start an appropriate alarm scenario. The camera creates a separate log file of all changes that have an effect on the sealing status.

**System integration and ONVIF conformance**

The camera conforms to the specifications for ONVIF Profile S and ONVIF Profile G. (ONVIF is the acronym for Open Network Video Interface Forum.) For H.265 configuration, the camera also supports Media Service 2, which is part of ONVIF Profile T. Compliance with these standards guarantees interoperability between network video products, regardless of manufacturer. Third-party integrators can easily access the internal feature set of the camera for integration into large projects. For more information, see the Bosch Integration Partner Program (IPP) website (ipp.boschsecurity.com).
Cameras with this platform are intended to be backwards compatible with existing VMS integrations. Compatibility of the app feature set that is available in the Application store is the responsibility of the app developer and of Security and Safety Things.

**Ease of installation**
The camera has been designed for quick and easy installation, a key feature from Bosch IP video security products. The camera supports mounting in upright, inverted, or canted orientation. The on-site canting functionality lets installers tilt down the upper section of the camera at a 35° angle. At this angle, operators can see the scene directly below the camera.

**Power options**
The camera can be powered by a network compliant to High Power-over-Ethernet using a Bosch model of High PoE Midspan (sold separately). With this configuration, only a single cable connection (Cat5e/Cat6 Shielded Twisted Pair (STP)) is needed to view, to power, and to control the camera. For maximum reliability, the camera can operate with a redundant power system of a High PoE Midspan and a separate 24 VAC power source connected simultaneously. If either the High PoE or 24 VAC power source fails, the camera seamlessly transitions to the remaining power source. The 60 W midspan can supply power to models without an illuminator accessory. The 95 W midspans can supply power to MIC cameras with or without the illuminator accessory. The camera can also accept a standard 24 VAC power source if a High PoE network interface will not be used. User-supplied wiring must be in compliance with electrical codes (Class 2 power levels). Refer to the table in the Installation/configuration notes section for more information.

**Camera Diagnostics**
The camera has several built-in sensors / advanced diagnostics that display warnings on the camera’s OSD about the health of the camera. The diagnostics log records the events such as:  
• Low voltage - a drop in incoming power below the level where the camera becomes non-functional  
• High temperature - the internal temperature exceeds specifications  
• Low temperature - the internal temperature exceeds minimum levels  
• High humidity - the internal humidity exceeds 70%  
• High vibration - the acceptable level of acceleration forces was exceeded  
• Total hours of camera operation  
• Illuminator aging history  
Certain events also appear on the camera’s OSD. These diagnostic records are available for the installation or service technician to review.

**Unsurpassed reliability**
As with all Bosch products, the camera is designed using the industry’s best design process and is subjected to the most stringent testing standards such as HALT (highly accelerated life testing), which pushes the limits of products to ensure reliability throughout their lifetime.

**Project Assistant**
*Project Assistant* by Bosch is the market’s most easy-to-use app for initial installation and basic configuration of IP cameras. Off-site and without connection to the camera, basic configurations can be created and then shared with colleagues. On-site, these pre-configurations can be pushed onto the camera, making the installation procedure easier and less time-consuming. Cameras previously configured can be integrated as well. The app allows easy viewing and adjustment of the camera’s field of view. The app automatically generates a comprehensive report of the commissioned cameras.

**Certifications and approvals**
For a full list of all related certifications/standards, refer to the Product Tests Report, available on the online catalog, on the Documents tab of the product page for your device. If the document is unavailable on the product page, contact your sales representative.

Mounting Bracket Options

Bosch designed MIC IP 7100i cameras for use in outdoor applications. In an enclosed installation area (for example, in a foundry, near a furnace, etc.), temperatures outside of the camera might exceed +65 °C (+149 °F). If you install a camera in an enclosed area, make sure that the operating temperature of the camera is a maximum of +60 °C (+140 °F). Make sure that air circulates around the camera to supply cooling.

The following figure identifies the optional mounting brackets for MIC cameras. Refer to the datasheets of each bracket for details. Some brackets may not be available in all regions.

Fig. 1: Optional Mounts, MIC IP 7100i series

1. Deep conduit adapter
2. Wall mount bracket
3. Pole mount bracket
4. Corner mount bracket
5. Wall mount spreader plate
6. Shallow conduit adapter

For more options, refer to the MIC IP cameras Accessory Quick Selection Guide (https://media.boschsecurity.com/fs/media/pb/media/support_1/tools/mic_ip_cameras_accessory_quick_selection_guide.pdf).

**Additional Camera Settings**

### Video content analysis

**Analysis type**
- Intelligent Video Analytics

**Configurations**
- Off / Global VCA / Profiles 1 - 16

**Calibration**
- Automatic self-calibrating when height is set

**Alarm rules (combinable)**
- Any object, Object in field, Crossing line, Entering field, Leaving field, Loitering, Following route, Idle object, Removed object, Counter, Occupancy, Crowd detection, Condition change, Similarity search, Tampering

**Object filters**
- Duration, Size, Aspect ratio v/h, Speed, Direction, Object classes (Upright persons, Bikes, Cars, Trucks), Color

**Network**
- Standard/Video compression: H.265, H.264 (ISO/IEC 14496), M-JPEG, JPEG

###Virtual Masks
- 24 individually configurable Virtual Masks to hide parts of the scene (background motion such as moving trees, pulsating lights, busy roads, etc.)

### Pre-positions
- 256 Pre-positions, each with 20 characters per Title

### Guard Tours
- Custom Recorded Tours - two (2), total duration 30 minutes:
  - Pre-position tour - one (1), consisting of up to 256 scenes consecutively, and one (1) customized with up to 256 user-defined scenes

### Supported Languages
- English, Czech, Dutch, French, German, Italian, Polish, Portuguese, Russian, Spanish, Japanese, Chinese

### Alarm control
- Rules-based logic supports basic and complex pre-defined user-specified commands
  - In its most basic form, a "rule" could define which input(s) should activate which output(s).

### Camera status monitoring
- Integrated sensors monitor operational status such as internal temperature, humidity level, incoming voltage level, vibration, and shock events.

### Diagnostics
- Various status conditions are tracked in the internal diagnostic log. Critical fault conditions will also be displayed on screen.

---

### Gains

- Automatic exposure, either full-screen or defined to a specific area
  - Focus

### Gain control
- AGC, Fixed, Region per pre-position

### Aperture Correction
- Horizontal and vertical

### Electronic Shutter Speed (AES)
- 1/1 sec to 1/60,000 sec

### Signal-to-Noise Ratio (SNR)
- >55 dB

### Backlight compensation (BLC)
- On │ Off │ Intelligent Auto Exposure (IAE)

### White balance
- 2000 K to 10,000 K
  - ATW, AWB Hold, Extended ATW, Manual, Sodium Lamp Auto, Sodium Lamp

### Day/night
- Monochrome │ Color │ Auto

### Defog mode feature
- Improves visibility when viewing foggy or other low-contrast scenes.

### Noise Reduction
- Intelligent Dynamic Noise Reduction

### Sectors
- 4, 6, 8, 9, 12, or 16 user-selectable, independent Sectors, each with 20 characters per Title

### Privacy Masks
- 32 individually configurable Privacy Masks; maximum 8 per Pre-position; programmable with 3, 4 or 5 corners; select your own color from the color palette.
  - With the "Auto" option, the camera selects the most prevalent of the three colors in the background scene as the pattern color.
  - With the "Mosaic" option, the movements behind a Privacy Mask will remain visible.
Streaming

3 fully configurable streams, with the option to activate or deactivate VCA overlays on each stream.

Mechanical

Drive Unit Brushless, integral pan/tilt motor drive

Supported mounting orientation Upright, Inverted, Canted

Pan Range 360° continuous rotation

Tilt Angle 290° (with or without illuminator)

Tilt Range (With or without illuminator) Upright: -55° to +90°; Inverted: -95° to +55°; Canted: -80° to +65°

Variable Pan Speed 0.2/second - 120/second

Variable Tilt Speed 0.2/second - 90/second

Speed of Pre-positions 120/second

Pre-position Accuracy +/-0.05°

Proportional Pan / Tilt to Zoom Yes

Audible Noise <65 dB

Electrical

Input voltage 21-30 VAC, 50/60 Hz; High Power over Ethernet 56VDC nominal

Power Consumption (typical), without illuminator 40 W

Power Consumption (typical), with illuminator 70 W

Current consumption, 24 VAC ~3.15A

Current consumption, High PoE ~1.5A

Redundant configuration Connect both a High PoE Midspan and a separate 24 VAC power source. If either power source fails, the camera automatically switches to the other power source.

Surge protection Built-in surge protection for power, data, and network interfaces (Refer to the A&E Specifications for details.)

Communications / Software Control

* Must purchase NPD-9501A or NPD-9501-E in order to use the High PoE solution.

Audio

| Compression | G.711, AAC, and L16 (live and recording) |
| Signal-to-Noise Ratio (SNR) | Audio in: 47 dBA | Audio out: 50 dBA |
| Mode | Two-way, full duplex audio communication |
| User connections | Line in: 130k ohm typical / 1.0Vrms, max | Line out: 0.8Vrms at 2.4 ohm, typical |

Environmental

The customer is responsible for making sure that the installation complies with the specified stresses that follow.

Note: Unit includes internal heater and fan.

| Ingress Protection Rating/Standard | IEC 60529 IP66 / IP68 / Type 6P (dust and immersion) when installed on a MIC-DCA, or on a MIC wall mount with a MIC-SCA. IP67 (moisture and dust) with the IP67 Connector Kit (MIC-9K-IP67-5PK) on the connectors in the camera base. This kit is also required when using non-Bosch mounts. |

External Mechanical Impact (IK Code / Impact rating)

| Operating temperature | -40 °C to +65 °C (-40 °F to +149 °F) |
| NEMA TS 2-2003 (R2008), para 2.1.5.1 using fig. 2.1 test profile | -34 °C to +74 °C (-30 °F to +165 °F) for 15 hours |
| Cold Start-up Temperature | -40 °C (-40 °F) (Requires 60-minute warm-up prior to PTZ operations.) |
| Storage temperature | -45 °C to +70 °C (-49 °F to +158 °F) |
| Humidity | 0-100% |

Wind Load

Sustained winds up to 161 kph (100 mph)
An upright camera or an inverted camera with an illuminator will hold its position in gusts up to 241 kph (150 mph).
A canted camera with an illuminator will hold its position in gusts up to 257 km/h (160 mph).

Effective Projected Area (EPA)

Camera + DCA: 0.0725 m² (0.78 ft²)
Camera + DCA + illuminator: 0.0854 m² (0.92 ft²)

Vibration

IEC 60068-2-6: 10-150 Hz, 1.0G (0.5G on canted unit), 10m/s², 20 Sweeps
NEMA TS-2 Section 2.2.8: 5-30 Hz, 0.5G
MIL-STD-167-1A

Shock

IEC 60068-2-27, Test Ea: Shock, half sine impulse, 11 ms, 45G (20G on canted unit), non-repetitive shocks (three shocks in each axis and in each direction)
NEMA TS 2 Section 2.2.9 Shock (Impact) Test Half sine wave 11 ms, 10G

Power Service Transients

NEMA TS2 Section 2.2.7.2

Power Interruption

NEMA TS2 Section 2.2.10

MIL-STD-810 Military Standard Test Methods

MIL-STD-810-G, 501.5 High Temperature; MIL-STD-810-G, 502.5 Low Temperature; MIL-STD-810-G, 503.5 Temperature Shock; MIL-

**Salt Mist Spray**

ISO 12944-6: C5-M (High); Aluminum Housing Components

**Salt Fog**

MIL-STD-810-G, 510.5 Sand and Dust

**STD-810-G, 505.5 Solar Radiation; MIL-STD-810-G, 506.5 Rain; MIL-STD-810-G, 509.5**

**Construction**

**Dimensions (W x H x D)**

- **Without illuminator accessory or sunshield:**
  - **Upright, Inverted:**
    - 287.93 mm x 400.34 mm x 210.65 mm (11.34 in. x 15.76 in. x 8.29 in.)
  - **Canted:**
    - 260.25 mm (10.2 in.) x 374.5 mm (14.7 in.)

- **Weight:** 8.7 Kg (19.2 lb)

**Window**

Flat glass (with defroster on enhanced models only)

Defroster starts automatically at <= 5 °C (41 °F).

**Construction Material**

Anodized cast aluminum

**Window Wiper**

Integrated, long-life silicone wiper

**Sunshield**

(to prevent sun load in hot climates)

Optional (sold separately)

**Canting**

On-site canting functionality

**Color**

- **Black** (RAL 9005)
- **White** (RAL 9010)
- **Grey** (RAL 7001)

**Standard Finish**

Corrosion-resistant, powder coat paint, sand finish

**Accessories**

**MIC-ILB-400 Illuminator, white-IR light, black**

Illuminator accessory for certain MIC IP cameras, IR Light (850 nm/940 nm) + White light LEDs

Black (RAL 9005). Sand finish.

Order number **MIC-ILB-400 | F.01U.370.191**

**MIC-ILW-400 Illuminator, white-IR light, white**

Illuminator accessory for certain MIC IP cameras, IR Light (850 nm/940 nm) + White light LEDs

White (RAL 9010). Sand finish.

Order number **MIC-ILW-400 | F.01U.370.192**

**MIC-ILG-400 Illuminator, white-IR light, gray**

Illuminator accessory for certain MIC IP cameras, IR Light (850 nm/940 nm) + White light LEDs

Grey (RAL 7001). Sand finish.

Order number **MIC-ILG-400 | F.01U.370.193**

**NPD-6001B Midspan, 60W, single port, AC in**

60 W indoor midspan for cameras without illuminators

Order number **NPD-6001B | F.01U.347.358 F.01U.392.458**

**NPD-9501A Midspan, 95W, single port, AC in**

95 W indoor PoE midspan for AUTODOME and MIC cameras

Order number **NPD-9501A | F.01U.286.250 F.01U.392.336**

**NPD-9501-E Midspan 95W 1 port outdoor**

95 W outdoor PoE midspan for AUTODOME and MIC cameras

Order number **NPD-9501-E | F.01U.365.279**

**Ordering information**

**MIC-7602-Z30B PTZ 2MP 30x starlight black**

Ruggedized, outdoor PTZ camera; 1080p HD, 30x, starlight imaging, H.265, IVA

open camera platform

Black (RAL 9005). Sand finish.

Order number **MIC-7602-Z30B | F.01U.382.403 F.01U.386.569**

**MIC-7602-Z30W PTZ 2MP 30x starlight white**

Ruggedized, outdoor PTZ camera; 1080p HD, 30x, starlight imaging, H.265, IVA

open camera platform

White (RAL 9010). Sand finish.

Order number **MIC-7602-Z30W | F.01U.382.404 F.01U.386.570**

**MIC-7602-Z30G PTZ 2MP 30x starlight gray**

Ruggedized, outdoor PTZ camera; 1080p HD, 30x, starlight imaging, H.265, IVA

open camera platform

Grey (RAL 7001) color. Sand finish.

Order number **MIC-7602-Z30G | F.01U.382.405 F.01U.386.571**

**MIC-7602-Z30BR PTZ 2MP 30x starlight enhanced black**

Ruggedized PTZ camera; 1080p, 30x, starlight imaging, defroster

open camera platform

Black (RAL 9005). Sand finish.

Order number **MIC-7602-Z30BR | F.01U.381.145 F.01U.386.563**

**MIC-7602-Z30WR PTZ 2MP 30x starlight enhanced white**

Ruggedized PTZ camera; 1080p, 30x, starlight imaging, defroster

open camera platform

White (RAL 9010). Sand finish.

Order number **MIC-7602-Z30WR | F.01U.381.146 F.01U.386.564**

**MIC-7602-Z30GR PTZ 2MP 30x starlight enhanced gray**

Ruggedized PTZ camera; 1080p, 30x, starlight imaging, defroster

open camera platform

Grey (RAL 7001) color. Sand finish.

Order number **MIC-7602-Z30GR | F.01U.381.147 F.01U.386.565**
**VG4-A-PSU1 PSU, 120VAC, for AUTODOME, MIC7000**
Power supply for AUTODOME 7000, MIC IP cameras without illuminators.
120VAC in, 24VAC out
Order number VG4-A-PSU1 | F.01U.009.667 F.01U.081.593 F.01U.261.377

**VG4-A-PSU2 Power supply, 230VAC, AUTODOME, MIC7000**
Power supply for AUTODOME 7000, MIC IP cameras without illuminators.
230VAC in, 24VAC out
Order number VG4-A-PSU2 | F.01U.009.668 F.01U.096.639 F.01U.081.604 F.01U.261.378

**MIC-DCA-HB Deep conduit mount, M25 holes, black**
DCA mount for MIC7000 family and MIC IP fusion 9000i cameras. Aluminum. Two M25 holes for conduit/cable glands.
Black (RAL 9005) color.
Order number MIC-DCA-HB | F.01U.286.244

**MIC-DCA-HBA Deep conduit mount, M25 holes, black**
Black (RAL 9005) color.
Order number MIC-DCA-HBA | F.01U.303.166

**MIC-DCA-HW Deep conduit mount, two M25 holes, white**
DCA mount for MIC7000 family and MIC IP fusion 9000i cameras. Aluminum. Two M25 holes for conduit/cable glands.
White (RAL 9010) color.
Order number MIC-DCA-HW | F.01U.286.245

**MIC-DCA-HWA Deep conduit mount, M25 holes, white**
White (RAL 9010) color.
Order number MIC-DCA-HWA | F.01U.303.167

**MIC-DCA-HG Deep conduit mount, two M25 holes, grey**
DCA mount for MIC7000 family and MIC IP fusion 9000i cameras. Aluminum. Two M25 holes for conduit/cable glands.
Grey (RAL 7001) color.
Order number MIC-DCA-HG | F.01U.286.246

**MIC-DCA-HGA Deep conduit mount, M25 holes, grey**
Grey (RAL 7001) color.
Order number MIC-DCA-HGA | F.01U.303.168

**MIC-WMB-BD Wall mount bracket, black**
Wall mount bracket, black sand finish (RAL9005)
Order number MIC-WMB-BD | F.01U.143.155

**MIC-WMB-WD Wall mount bracket, white**
Wall mount bracket, white sand finish (RAL9010)
Order number MIC-WMB-WD | F.01U.143.156

**MIC-WMB-MG Wall mount for rugged PTZ camera, grey**
Wall Mount Bracket.
Grey (RAL 7001) color. Sand finish.
Order number MIC-WMB-MG | F.01U.296.299

**MIC-SCA-BD Shallow conduit adapter, black sand**
Shallow conduit adapter for a MIC-WMB, a MIC-PMB, or a MIC-SPR, black sand finish (RAL9005)
Order number MIC-SCA-BD | F.01U.143.153

**MIC-SCA-WD Shallow conduit adapter, white sand**
Shallow conduit adapter for a MIC-WMB, a MIC-PMB, or a MIC-SPR mount, white sand finish (RAL9010)
Order number MIC-SCA-WD | F.01U.143.154

**MIC-SCA-MG Conduit adapter, shallow, grey sand**
Shallow conduit adapter for a MIC-WMB, a MIC-PMB, or a MIC-SPR.
Grey (RAL 7001) color. Sand finish.
Order number MIC-SCA-MG | F.01U.296.297

**MIC-PMB Pole mount bracket**
Pole mount bracket (includes 2 x 455 mm stainless steel banding straps for pole diameters 75 to 145 mm)
Order number MIC-PMB | F.01U.087.283

**MIC-CMB-BD Corner mount bracket, black**
Corner mount bracket, black sand finish (RAL9005)
Order number MIC-CMB-BD | F.01U.143.158

**MIC-CMB-WD Corner mount bracket, white**
Corner mount bracket, white sand finish (RAL9010)
Order number MIC-CMB-WD | F.01U.143.159

**MIC-CMB-MG Corner mount bracket, grey sand**
Corner mount bracket.
Grey (RAL 7001) color. Sand finish.
Order number MIC-CMB-MG | F.01U.296.296

**MIC-SPR-BD Wall mount spreader plate, black sand**
Aluminum spreader plate suitable for brickwork surface mounting, black sand finish (RAL9005)
Order number MIC-SPR-BD | F.01U.143.164

**MIC-SPR-WD Wall mount spreader plate, white sand**
Aluminum spreader plate suitable for brickwork surface mounting, white sand finish (RAL9010)
Order number MIC-SPR-WD | F.01U.143.163

**MIC-SPR-MG Wall mount spreader plate, grey sand**
Aluminum spreader plate suitable for brickwork surface mounting.
Grey (RAL 7001) color. Sand finish.
Order number MIC-SPR-MG | F.01U.296.298

**MIC-M25XNPT34 Adapter, M25 to 3/4"NPT, stainless steel**
Stainless Steel M25 to ¾” NPT thread adapter
Order number MIC-M25XNPT34 | F.01U.301.975

**MIC-WKT-IR Washer kit, MIC IR**
Washer kit for MIC IP starlight 7000i and MIC IP fusion 9000i camera models
Washer kit for analog infrared MIC camera models
Order number MIC-WKT-IR | F.01U.087.255
MIC-IP67-5PK Connector kit, IP67, 5pcs
5-pack weather protection kit for MIC7000 cameras. Provides an IP67-rated barrier against dust or moisture. Recommended when MIC camera is mounted directly to installation surface (instead of onto a MIC-DCA or MIC wall mount).
Order number MIC-IP67-5PK | F.01U.294.750

MIC-7100I-SNSHLD-W Sunshield for MIC 7100i white Sunshield for MIC IP ultra 7100i camera models
Order number MIC-7100I-SNSHLD-W | F.01U.353.591

Services
EWE-MIC7IF-IW 12 mths full wrty ext MIC IP 7000i
