The high dynamic range FLEXIDOME IP dynamic 7000 RD camera combines intelligence with adaptive video processing to bring you high performance content-based imaging in any security or surveillance scenario, day or night. The camera uses an internal feedback system based on the intelligent analysis of the scene, to re-tune the video processing. This provides better detail in the areas that matter and better all-round performance.

System overview

Compared to SD cameras, the FLEXIDOME IP 7000 RD offers, at no higher cost, motorized autofocus, higher resolution, better sensitivity, higher frame rates, and improved picture quality, and is still more bandwidth-efficient. Video storage costs are significantly reduced.

Functions

High Dynamic Range
The High Dynamic Range (HDR) of the camera means that you can view details in the bright and the dark areas of a scene at the same time. HDR is based on a dual exposure process that captures more details in highlights and shadows even under challenging lighting conditions. The result is that you can distinguish objects and features easily.

Content Based Imaging Technology
Content Based Imaging Technology (CBIT) is used to radically improve image quality in all lighting conditions and to identify areas for enhanced processing. The camera examines the scene using Intelligent Video Analytics and provides feedback to re-tune the image processing. This provides better detail in the areas that matter and better all-round performance. With IVA, the Intelligent Auto Exposure technology, for example, allows you to view moving objects in bright and dark areas of a scene.

Intelligent Dynamic Noise Reduction reduces bandwidth and storage requirements
The camera uses Intelligent Dynamic Noise Reduction which actively analyzes the contents of a scene and reduces noise artifacts accordingly. The low-noise image and the efficient H.264 compression technology provide clear images while reducing bandwidth and storage by up to 50% compared to other H.264 cameras. This results in reduced-bandwidth streams that still retain a high
image quality and smooth motion. The camera provides the most usable image possible by cleverly optimizing the detail-to-bandwidth ratio.

**Flexible lens choice**
The camera comes with a choice of tele, mid-range, and ultra wide angle lenses. These varifocal SR (Super Resolution) lenses have an advanced iris design to ensure that the high resolution HD sensor produces the sharpest image possible, even in the corners. The optically corrected ultra wide angle lens provides outstanding performance without the need for de-warping software.

**Simple installation**
The camera has a very intuitive user interface that allows fast and easy configuration. Six configurable user modes are provided with the best settings for a variety of applications:

- **Outdoor** – general day-to-night changes with sun highlights and street lighting
- **Indoor** – general day-to-night changes without sun highlights and street lighting
- **Motion** – monitoring traffic or fast moving objects; motion artifacts are minimized
- **Lowlight** – optimized for sufficient details at low light.
- **Intelligent AE** – for people moving in front of a bright background.
- **Vibrant** – enhanced contrast, sharpness and saturation

The auto-focus lens wizard makes it easy for an installer to accurately focus the camera for both day and night operation. The wizard is activated from the web browser or from the on-board camera push button making it easy to choose the workflow that suits best. The automatic motorized back focus adjustment with 1:1 pixel mapping ensures the camera is always focused accurately.

**Streams**
The innovative multi-streaming feature delivers various H.264 streams together with an M-JPEG stream. These streams facilitate bandwidth-efficient viewing and recording as well as integration with third-party video management systems.

An upright mode can be selected for the second stream. In this mode an image of 400 x 720 (9:16 aspect ratio) is cropped from the full sensor image. When the scene to be monitored is suitable to this mode, the bandwidth and storage requirements are reduced.

**Storage management**
Recording management can be controlled by the Bosch Video Recording Manager (VRM) or the camera can use iSCSI targets directly without any recording software.

**Edge recording**
The internal MicroSD card slot supports up to 2 TB of storage capacity. A microSD card can be used for local alarm recording. Pre-alarm recording in RAM reduces recording bandwidth on the network, or — if microSD card recording is used — extends the effective life of the storage medium.

**Video analytics**
With built-in video content analysis, the camera reinforces the Intelligence-at-the-Edge concept where edge devices become increasingly intelligent.

The latest generation of the Bosch Intelligent Video Analysis (IVA) software is the guard-assistant system of choice when reliable indoor or outdoor video analytics is needed. The state-of-the-art system reliably detects, tracks, and analyzes moving objects while suppressing unwanted alarms from spurious sources in the image.

The face detection feature detects faces in the scene and forwards a high quality JPEG image of the best shot of each face when the face disappears from the scene.

Retrospective forensic search capabilities are available remotely from the web browser or the Bosch Video Client.

**Regions of interest**
Two Regions of Interest (ROI) can be user defined. The remote electronic pan, tilt and zoom controls allow you to select specific areas of the parent image. These regions produce separate streams for remote viewing and recording. These streams, together with the main stream, allow the operator to separately monitor the most interesting part of a scene while still retaining situational awareness.

The IVA Intelligent tracker can also follow objects within the defined regions of interest. The Intelligent tracker can autonomously detect and track moving objects or the user can click on an object which the Intelligent tracker will then follow.

**Rugged design**
The cast-aluminum housing, polycarbonate window, and hardened inner liner can withstand the equivalent of 55 kg (120 lbs) of force (>IK10). Ideal for outdoor use, the camera is protected against water and dust to IP66 and IP67 (NEMA -4X) standards. Using the proprietary pan/tilt/rotation mechanism, installers can select the exact field of view. Mounting options are numerous, including surface, wall, corner, and suspended-ceiling mounting.

**Access Security**
Password protection with three levels and 802.1x authentication is supported. To secure Web browser access, use HTTPS with a SSL certificate stored in the camera. The video and audio communication channels can be independently AES encrypted with 128-bit keys by installing the optional encryption site license.
Surveillance software
There are many ways to access the camera’s video and IVA-based features: using a web browser, with the Bosch Video Management System, with the Bosch Recording System, with the free-of-charge Bosch Video Client, or with the video security mobile App. The Bosch Video Client PC surveillance software offers a user-friendly interface to support easy installation and configuration. It also provides easy live viewing of multiple cameras, playback, forensic search and export. Access to IVA metadata is available to integrators via RTSP.

Video security App
The Bosch video security mobile App has been developed to enable Anywhere access to HD surveillance images allowing you to view live images from any location. The App is designed to give you complete control of all your cameras, from panning and tilting to zoom and focus functions. It’s like taking your control room with you. This App, together with the separately available Bosch transcoder, will allow you to fully utilize our dynamic transcoding features so you can play back images even over low-bandwidth connections.

Connections
The camera conforms to the ONVIF (Open Network Video Interface Forum) Profile S specification which guarantees interoperability between network video products regardless of manufacturer. For trouble-free network cabling, the camera supports Auto-MDIX which allows the use of straight or cross-over cables. Camera power is supplied via PoE (Power-over-Ethernet) or via the 24 VAC/12 VDC connector. Third-party integrators can easily access the internal feature set of the camera for integration into large projects. Visit the Bosch Integration Partner Program (IPP) website (ipp.boschsecurity.com) for more information.

Some typical applications
- Tunnels – viewing details in bright and dark areas
- Entrances and exits – identification with strong backlight
- Traffic – capturing moving vehicles at night

Certifications and approvals

### HD Standards
Complies with the SMPTE 274M-2008 Standard in:
- Resolution: 1920x1080
- Scan: Progressive
- Color representation: complies with ITU-R BT.709
- Aspect ratio: 16:9
- Frame rate: 25 and 30 frames/s

Complies with the 296M-2001 Standard in:
- Resolution: 1280x720
- Scan: Progressive
- Color representation: complies with ITU-R BT.709
- Aspect ratio: 16:9
- Frame rate: 25 and 30 frames/s

*Chapters 7 and 8 (mains voltage supply requirement) are not applicable to the camera. However, if the system in which this camera is used needs to comply with this standard, then any power supplies used must comply with this standard.
Installation/configuration notes

Dimensions

Mounting Brackets (not included)

VDA-832FHD-WMT Wall mount dimensions

LTC 9213/01 Pole Mount Adapter dimensions
VDA-832FHD-PMT Pipe mount dimensions
Parts included

The packaging contains:
• FLEXIDOME HD IP camera
• Torx screwdriver bit
• Camera mounting kit
• RJ45 female-to-female network cable connector
• Quick install instructions and safety instructions

Technical specifications

Electrical

| Power Supply                | 24 VAC 50/60 Hz  
|                            | 12 VDC  
|                            | Power-over-Ethernet 48 VDC nominal |
| Current Consumption        | 1 A (12 VDC)  
|                            | 0.8 A (24 VAC)  
|                            | 0.3 A (PoE 48 VDC) |
| Power Consumption          | 12 W |
| PoE                        | IEEE 802.3af (802.3at Type 1) |

Sensor

| Type          | 1/3-inch CMOS HD |
| Pixels        | 2048 x 1536 (3MP) |

Video streams

| Video compression       | H.264 (ISO/IEC 14496-10); M-JPEG; JPEG |
| Streaming               | Multiple configurable streams in H.264 and M-JPEG, configurable frame rate and bandwidth. Regions of Interest (ROI) |
| Overall IP Delay        | Min. 120 ms, Max. 240 ms |
| GOP structure           | IP, IBP, IBBP |
| Encoding interval       | 1 to 30 (25) ips |

Resolutions (H x V)

**Mechanical**

- **Dimensions (D x H)**: 208 x 151 mm (8.2 x 5.95 in)
- **Weight**: 2200 g (4.85 lb)
- **Color**: RAL 9007 Metallic Titanium

**Environmental**

- **Operating Temperature**: -50°C to +50°C (-58°F to 122°F) for continuous operation; -34°C to +74°C (-30°F to +165°F) according to NEMA TS 2-2003 (R2008), para 2.1.5.1 using fig. 2.1 test profile
- **Cold Start Temperature**: -20°C (-4°F)
- **Storage Temperature**: -30°C to +70°C (-22°F to +158°F)
- **Operating Humidity**: 20% to 100% RH
- **Storage Humidity**: up to 100% RH
- **Vandal Resistance**: IK10
- **Ingress Resistance**: IP66, IP67, NEMA-4X

**Ordering information**

**FLEXIDOME IP dynamic 7000 RD**
High-performance IP dome camera for HD surveillance. HDR; 1080p30; IVA; IP66; IP67; >IK10; IDNR; IAE; ROI; H.264 quad-streaming; cloud services; free viewing Apps; 1.8 to 3 mm SR lens
Order number **NDN-932V02-IP**

**FLEXIDOME IP dynamic 7000 RD**
High-performance IP dome camera for HD surveillance. HDR; 1080p30; IVA; IP66; IP67; >IK10; IDNR; IAE; ROI; H.264 quad-streaming; cloud services; free viewing Apps; 3.8 to 13 mm SR lens
Order number **NDN-932V03-IP**

**FLEXIDOME IP dynamic 7000 RD**
High-performance IP dome camera for HD surveillance. HDR; 1080p30; IVA; IP66; IP67; >IK10; IDNR; IAE; ROI; H.264 quad-streaming; cloud services; free viewing Apps; 9 to 40 mm SR lens
Order number **NDN-932V09-IP**

**Accessories**

- **VDA-832FHD-WMT Wall Mount**
  Wall mount bracket for HD FlexiDomes
  Order number **VDA-832FHD-WMT**

- **VDA-832FHD-PMT Pipe Mount**
  Pendant pipe mount bracket for HD FlexiDomes
  Order number **VDA-832FHD-PMT**
LTC 9213/01 Pole Mount Adapter
Flexible pole mount adapter for camera mounts (use together with the appropriate wall mount bracket). Max. 9 kg (20 lb); 3 to 15 inch diameter pole; stainless steel straps
Order number LTC 9213/01

S1460 Service/Monitor Cable
2.5 mm jack to BNC video connector cable. 1 m
Order number S1460

VIDEOJET XTC XF Video Transcoder
High-performance video transcoder. H.264; CF card slot; ROI; max resolution 1080p; 2 channels
Order number VJT-XTCXF

VDA-CMT-PTZDOME Corner Mount Adapter
Corner (270°) mount adapter for use with the appropriate wall mount
Order number VDA-CMT-PTZDOME

NPD-5001-POE Midspan PoE Injector
Power-over-Ethernet midspan injector for use with PoE enabled cameras; 15.4 W, 1-port
Order number NPD-5001-POE

NPD-5004-POE Midspan PoE Injector
Power-over-Ethernet midspan injectors for use with PoE enabled cameras; 15.4 W, 4-ports
Order number NPD-5004-POE
