Plena Matrix Update Instructions

Please follow this quick guide to update your Plena Matrix PC Control Software, as well as the firmware version on your PLM-8M8 and/or PLM-4Px2x.

Requirements:

- Windows PC with an Ethernet Interface
- CAT5/6/7 Patch Cable

Plena Matrix PC Control Software Update (v1.2.28.0)

- 1. Download the latest version of our software from our website
- 2. Open the *PlenaMatrix_1* folder.
- 3. Install software by executing Setup.exe.

Firmware Update for PLM-8M8 (v.1.1.17)

- 1. You must have the latest version of the PC Control Software installed (v1.2.28.0). If you don't, please refer to the section above.
- 2. Confirm that the PC Ethernet interface is set to "Obtain an IP address automatically".
- 3. Connect the PC to the PLM-8M8 using the patch cable.
- 4. Launch the PLM-8M8DSP Matrix Mixer application.
