Easy Series for villa and apartment projects

BOSCH

Invented for life

Easy Series Control Panel

Making security easy and reliable

Add value to your innovative real-estate projects

Ambitious apartment blocks, tall building and compound projects offer customers a luxurious and safe living environment. As customers look for luxury and safety in their living environment topics like fire safety, intrusion detection and control features are on the list of wishes for apartment or villa delivery.

The Easy Series System from Bosch offers your customers benefits in fire, intrusion and remote control applications. Conettix from Bosch offers connectivity for alarm handling in the central monitoring station.

Ideal features to please your customers

Easy Series is unique of its kind. It is stylish designed, provides easy operation and talks to users in their native language.

World wide access to the system

Remote control allows access to the system by phone. Disarming the system to let somebody enter the premises and arming it again once they have left. Check the system status by phone, control the garage door or grant access by releasing the door lock.

Intrusion detection

Customers investing in real estate, like to see their property looked after. Sophisticated wireless sensors detect intrusion without the need for obstructive cabling. The system reports voice alarms to mobile phones or alerts the guardhouse in the complex.

The receiving station can even pinpoint the location of the alarm, providing immediate help. In the event of an alarm, a security guard can check the premises during users' absence with a guard code.

Alarm transmission over PSTN, GSM or IP-networks

Fire safety

Nothing in life is more precious than life itself. With an increasing number of electronic devices with stand-by modes, the risk of a fire developing increases.

The early fire detection of the wireless smoke detectors makes life and premises more secure. The integrated siren sounds the alarm at once and a signal is transmitted to the monitoring center, which triggers immediate intervention.

Medical alarm

If medical assistance is required, wireless key fobs can be used to trigger medical alarms. The system notifies family or the guard house in the complex.

- ▶ Wireless panic button
- ▶ Medical alarm transmission

Makes your real estate projects more attractive for your clients

Bosch offers the optimal solution in security for guarded complexes. With each villa or apartment equipped with Easy Series, intrusion, fire and medical security is available in the premises. The system can be operated with RFID Tokens or key fobs.

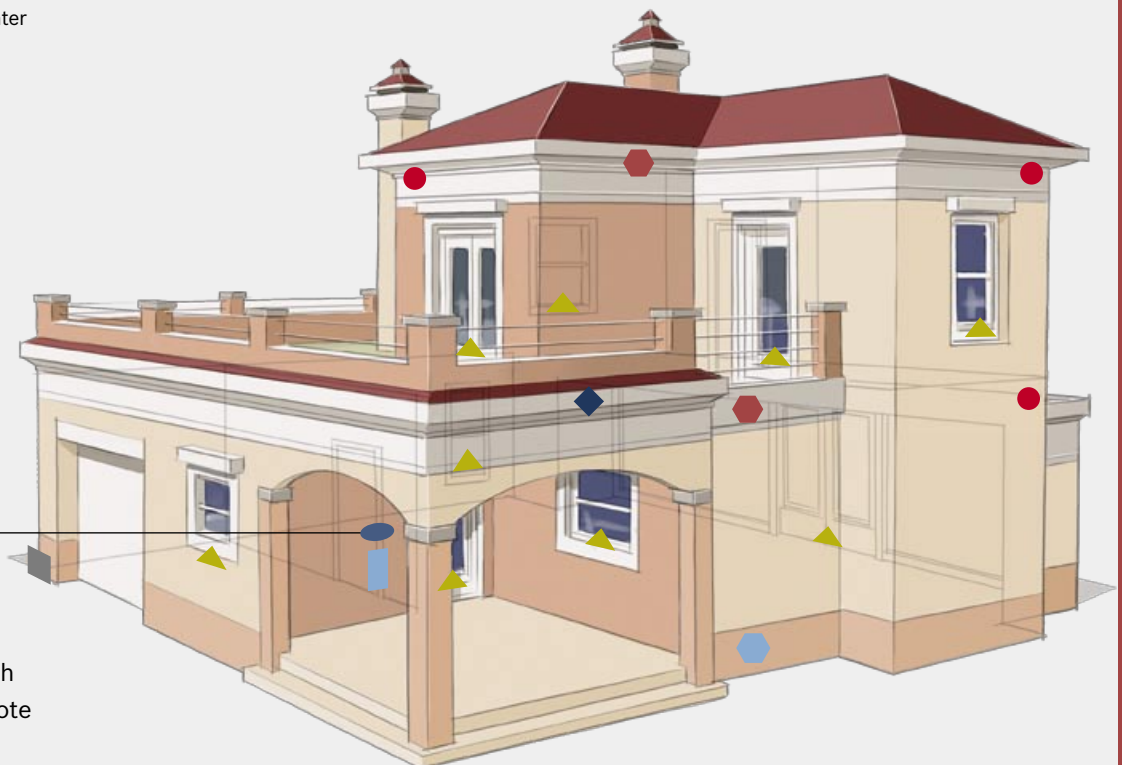

By using Bosch wireless technology there is no need for obstructive cabling in the buildings. The range of the wireless devices can reach up to 1000 meters in open field giving excellent coverage. All the villas connect to the Bosch central receiver through PSTN, GSM or IP networks. Here alarms are received for follow-up by the guard. For quick identification the central monitoring software will view plans indicating the location of the premises sending the alarm.

A connected Bosch CCTV system can give video alarm verification through the Building Integration System from Bosch (Management Software) if required.

Access control allowing gate control and building access security can also be integrated into the system where needed.

- ▶ Alarm transmission over PSTN, GSM or IP networks
- ▶ Central monitoring
- ▶ CCTV monitoring and alarm verification
- ▶ Access control
- ▶ Management software with floor plans and alarm messages

- Easy Series Control Center
