1 Scope

This release note gives an overview of the changes compared to the previous releases and is intended for upgrading (replacing) existing installed Praesideo PC Call Stations.

The Install package (ZIP) contains 4 installers being:

- ▶ Praesideo PC Call Server 4.45
- ▶ Praesideo PC Call Server Configuration Client 4.45
- ▶ Praesideo PC Call Station Client 4.45
- ▶ Praesideo PC Telephone Interface Client 4.45

To update your existing application install the corresponding 4.45 version from the Install package.

The PC Call station 4.45 is compatible with Praesideo firmware 3.64 and higher.

2 Changes

- Fixed a critical-severity CVSS Rating (9.8) vulnerability (related CWE-642: External Control of Critical State Data). For more details refer to our Security Advisory [BOSCH-SA-106054-BT](https://www.boschsecurity.com/xc/en/support/product-security/security-advisories.html), published at our Security Advisory web page <https://www.boschsecurity.com/xc/en/support/product-security/security-advisories.html>.
- Fixed a high-severity CVSS Rating (8.1) vulnerability (related CWE-319: Cleartext Transmission of Sensitive Information). For more details refer to our Security Advisory [BOSCH-SA-106054-BT](https://www.boschsecurity.com/xc/en/support/product-security/security-advisories.html), published at our Security Advisory web page <https://www.boschsecurity.com/xc/en/support/product-security/security-advisories.html>.
