Product:	SSD Plugin for AutoCAD® software
CTN:	FSD-CAD-BASE
Version:	1.3

This document contains latest information about the SSD Plugin for AutoCAD® software - version **1.3**.

Changes compared to version **1.1** are marked in **blue**. This release is a bug fixing release.

How-to dedicated to the SSD Plugin for AutoCAD® software can be found [HERE](#).

1 General

The Bosch SSD Plugin for AutoCAD® software is a windows-based application that supports the activities of architects, planners, specifiers and system integrators at different stages of a fire alarm project.

It provides the user with a free of charge SSD CAD blocks library of fire alarm peripherals.

With the SSD project palette, it enables the user to keep a precise overview of the configured fire alarm peripherals and their assignment to specific loops and panels.

The total quantities of fire alarm peripherals in an AutoCAD® floor plan are saved in an .ifc file that can be rapidly imported to Safety Systems Designer.

2 New features and fixes

Bugfixing:

- Adding a value in SSD_Element attribute is not deleting the project tree in SSD Project palette anymore
- If AutoCAD insert mode is active (e.g. CAD block selected in blocks palette) then the SSD Plugin “Configure” menu cannot be opened (new error message displayed) so that no CAD blocks are deleted anymore in model space.

The AutoCAD user must first exit the AutoCAD edit mode (Escape key) to be able to open the SSD Plugin “Configure” menu.

Import to Safety Systems Designer:

- The generated .ifc file can be imported to Safety Systems Designer version 2.5 or higher
- The products FAP-425-DOTCO-R and FRAY-ONE-EN are only supported by Safety Systems Designer version 3.0 onwards

3 Restrictions and known issues

In AutoCAD 2020, with the SSD Plugin for AutoCAD® software installed, the AutoCAD Publishing cannot be performed in the background (checkbox “Publish in background” must be unticked). Publishing in background can be used in AutoCAD 2023, with the SSD Plugin for AutoCAD® software installed.
